Thread: [Wondering how I can input directly to discord on multiple accounts with Discord.](#)

Memento_Mori - January 10, 2022, 8:28 pm

Does discord have an API that integrates with C#?

Essentially looking to make a botnet with discord accounts as a test.

Anyone had any luck with interacting with discord from the terminal?

Thanks in advance.

ASWELL as you have declare the bot's intentions in the API and the api config in your bot. After 100 servers discord requires your bot to be verified.

You can find Discord API Wrappers that still allow usage of User Accounts, this is obviously against Discord's ToS but since you're building a "botnet" I'm assuming that you don't care. Here is an example of one: <https://github.com/not-ilinked/Anarchy>.
