Thread: [SSH Tunnel / Reverse Proxy](#) .

yatzumdpv97 - January 12, 2022, 10:48 pm

Hi.

I'm trying to configure on my BP VPS , a REVERSE PROXY to run A R.A.T..

I'm struggling to do it from days, because i've already tried and setup it trough PuTTY, wihout SUCCESS. Can someone tell me a little guide on how-to-do it? willl be REALLY appreciated. I used services like ngrok and portmap.io, so I'm not a total newbie.

Which part isn't working out, the remote access towards the VPS?

Here's a guide that uses Google Remote Desktop (it uses DigitalOcean though, not BPHost)
<http://www.listchan.com/2021/07/list-to-do-list-when-making-vpsrdp.html>

Here's the link to Google Remote Desktop <https://remotedesktop.google.com/>

If [flavoral](#) can be bothered, he made a guide on how to set up a Google-based RDP in one of his blog posts, he might help you out.

Cheers!
