What apps do you guys use for free to find good anime on?

PiedPiper - January 13, 2022, 11:46 am

Aniwatcher or 123anime have always been good to me (with a good adblocker ofc).

Never fails.

How about Crunchyroll, quite nice

GenericSkid - January 14, 2022, 10:42 pm

Crunchyroll for mainstream consumption.

AnimeKisa or other similar sites otherwise. There's dozens of similar sites, doesn't really matter since most of them are just front-ends for videos uploaded on other servers.

If it's a new release or something, I will just use nyaa. Depending how bad I want to watch it.

I use Crunchyroll and 9anime. The best anime websites I have found so far that are reliable.
