Thread: [good rat in the moment?](#)

palmy - January 16, 2022, 3:11 am

It seems like bitrat getting stale and I dont like quasar so what a good rat for a good price?

LESiO - January 16, 2022, 5:04 am

is relatively expensive, but offers very good features, is stable and is, in my opinion, more of a professional tool than a personal tool.

jmark7 - January 16, 2022, 11:29 am

you should look into async rat, if you have not used it before,
Its also a free rat.

OhYeah424 - January 16, 2022, 4:00 pm

You can use old RATs like Darkcomet, Cybergate and Lime RAT! All of them are completely free.

completly free but totally outdated

MeW11 - January 17, 2022, 10:38 am

Quasar is good but you may want to learn to code and make one for yourself
And as long as they are not used for black hat activities

i dont think that 2012 rats work right in 2022
Its Detected af and with a Crypter i dont know
use Async if you want a free rat other wise bitrat i think

tmpdotglass - January 17, 2022, 12:18 pm

many rats would get AV detection from memory so you should try some paid one

Portgas - January 18, 2022, 6:18 pm

Download async from the official github, its the best.

Royal ! - January 19, 2022, 10:18 am

Async, Quasar, Webmonitor, BitRat are few to name. You can find Many Others if you Search. All Depends on the features you are Looking for in one.

All you need is a crypter and any RAT still works.

Every RAT is detected by antiviruses even paid ones. You need a crypter to make them undetectable.

That's right!
