Selling vulnerabilitys around the globe that I gather from private scanning.

My main focus is to provide you with vulns that you can report or exploit so that you can either build a curriculum on cybersecurity or profit.

Earn Hall of Fame or Bug Bounties.

Cheap and affordable prices, contact me and I will see what I got for you!

Why wouldn't you report the vulns yourself and take the profit from the bug bounties instead of selling the vulns for others to profit off of?

I report some, but there are a lot of them that will give you bounty even tho there is no bug bounty program in place.
