Thread: [How to track Instagram or Whatsapp messages](#)

ryder86 - January 20, 2022, 1:05 am

Hi there,

I would like to know a way of getting inside a Instagram account in order to track the messages or a way of tracking the whatsapp messages. I don't have access to the phone neither the passwords.

No one will do it for you for free, be prepared to pay for the work. The tangle method works here. If you need help, I can help

Which information about the system do you have? Full user agent?

Just curious, If you have the IMEI of the phone the whatsapp target is used with, can you clone the imei to intercept the messages? Its an android phone, or do you need physical access of the phone first?

I was referred to someone who claims they can do it, he wants \$800. DM me if you want his info as I'm not prepared to deal with someone not on this forum with a contract.
