**N** - January 20, 2022, 11:52 am

Pink LSZ is here for the long run. If you're invested in other groups feel free to join when they disband or die. Because they will.

Members of this group are literally the only friends [Zero](#) has. Dude thinks he's a dictator telling people what to do.

I will force you to be active and rep the group. Idc if you don't like pink. Pink LSZ is 100% dictatorship.

No broke bois. All we ask is for you to be active and loyal to the family.

Tell us who you are.

**Zexo** - January 20, 2022, 12:01 pm

Being honest this is the best group on hf period.

You get to be part of our family.

**Unholy** - January 20, 2022, 12:20 pm

So it seems to me that Pink LSZ currently holds one of the biggest families on the forum. I would love to be a part of that.

I am Unholy, and here is a little about myself. I am currently enlisted in the United States Marine Corps, (yes, I've probably said this everywhere, but honestly, it's probably one of the most interesting things about me). I'm not that special, went to university for graphic design, and am now completing my service doing something in a similar field. I get through my day and cure my boredom hopping on HackForums, and just lurking. I'm fairly active, even if I may not post all the time. I've been on HackForums for a little bit, and took notes on the rules and regulations. I would say I know my way around the help documents, and am constantly on the lookout to help keep the forum high quality. Sometimes I get bored and wouldn't mind hopping in a voice chat that is actually active to just talk about whatever.

I also enjoy gaming from time-to-time, I work on a fairly tight schedule, although I was super interested in joining the PinkCraft server, just waiting on one of your PMs for my username.

**blackrose\_x0x0** - January 20, 2022, 12:33 pm

I've only been with Pink LSZ for a couple months but this group really is great. Every member has been incredibly friendly and willing to help each other out with whatever it may be. Glad to be a part of this awesome group.

**?nxy** - January 20, 2022, 12:45 pm

Whoever made the graphics for this group is an absolute professional. I am in this group and it definitely does feel like a family. Join now bitches!

I would love to be a part of Pink Lsz!

A little about me: I'm a web developer who has a huge passion for web development. Like I live and breathe it daily. I've joined hack forums & quite frankly love it. On it daily even if I'm not posting much.

Currently learning more programming languages/frameworks & try to help out anyone in the best of my ability.

I love HF & I think the experience would be much better if I was a part of something more.

P.s I also just want a cool pink name ????

Hi I would like to apply to join the dictatorship.

I am a fairly actively member of this community. I do have a fucking job so I am more active after 4:30 EST. My free time unfortunately I waste it on my horrible League of legends addiction that Nintendo 64 rekindle trying to take a break from it since my team mates make me want to jump off a skyscraper. I also have horrible internet.

But I'm here again to see what's up, feel free to invite me again. Anyway, it's good to see some familiar names once more. Stay HQ.

Hey, Your banner and color is sick!

I love cHN5Y2hlZGVsaWNz, I'm into hacking and generally hacking/reporting vulns to gov's to get them fixed and earn cool t-shirts.

Love MmNiLCBsc2QslHdlZWQ= , old school hip hop, 2pac, 50 cent, Love Death Robots, Mr Robot, Extracurricular and I have megalomaniac thoughts sometimes to get the system in the right direction not to be a hearth-less dictator..

When I'm free I usually grind valorant, or cheat on Warzone to hear pigs screaming when they get PSilent'd while i'm falling with a parachute with a pistol which is so satisfying, I used to code private hacked clients for minecraft when i was 12 and I used to write cheats for S4 League at 11.

When I'm not busy being a fucken nerd I enjoy SPA's, Hookers and RHJ1Z3M= .

im active here, i think, idk ask someone in convo lol

anyway, yeah, im pretty boring but it would be cool if i can join

**the\_chairman** - January 28, 2022, 8:47 am

This was a great group to be part of. I think I took the Zeus thing too far hence being kicked without an actual warning or a second chance. Only warning I dis receive was vague. And really I did get kicked for no reason despite what people say. I understand the reason they gave and blatantly nobody took it as the obvious joke it was. Didnt even get a chance to prove myself.

Goodluck to all my guys... I'll be pink inside forever.

I'm on a mission to chase my dreams and become completely self reliant, my own boss.

I want to be a bigger part of the community and I think being a member of Pink LSZ will help me do so.

I'm active pretty much all day every day.

Unfortunately, you can't make a magazine with only two articles. We were going for: Sports, Science & Technology, World News, Internet Security, Gaming, Politics, Philosophy. A person applied to write about "Drug abuse" and another "Cannabis" and there were two applications falling under Gaming and Science & Technology which were part of the main themes that were put in front of the project.

I've also messaged members that I know have written in the past or that have contributed to the first magazine I published with Security, but none responded, or they were uninterested. But anyhow, as I've said, if someone is motivated to write articles falling into one of the above themes or somehow related, then I would be glad to work on the magazine with them ?

Quality plays a big factor within our solid position at #1.

Quality of members, relationships, structure, and operations being carried out. A lot of other groups don't operate in the way we do, and that's what helps us stand apart.

We won't even need to discuss the group's features, because that's self-explanatory.

What makes the group the top right now is the fact, we here at Pink LSZ are the leading group of HF right now. The group has active members who contribute towards the site and others a lot more than any other group is right now. The most active group I have been in since wolfpack when it was popping off! And by far the most giving and caring, loving members of HF currently. ?

I've been away from this online world for a few years just moving from one trouble to another... Recently got back and trying to fix things up

I work now with few friends, we rented a office and been pretty much just exchanging ideas till we start a project, most likely crypto related since most of them have been working for ICOs

Intelligent, respectable, like-minded bag chasers. I have a variety of skills and insight I believe I can contribute to the group. To list a few, web-dev/coding skills (Strongest languages are c++ and php), writing skills, and online marketing (specifically social media based). I have no interest in joining other groups and can guarantee that i'll be an active contributor to this one.

As I mentioned, I'm new to hackforums but I've already cross roads with some Pink members, and I love them all.

I am 33 years old, have two kids and a wife - I work as a full time developer on a nordic company and for that reason I spend a lot of time at my PC, so activity will not be a problem :)  
- I work mostly with c, c# and js at work currently, but I spent most of my school time with Python, PHP and CSS.

I can bring some coding knowledge and a good mood to the Pink LSZ Gang.

Hello Pink LSZ,

I'm clean, hope everyone is having a great day for starts. I've been here on HF for almost a year and have provided HQ exchanges and content to the forum. Very trusted as my B+ ratings speak for themselves. I like filling in spots on the forum where I think things are left out or unsaid, to make things better understood.

Today, I'm applying for Pink and I hope to see some of you around to learn more!

Thanks -clean

Hi Pink LSZ!

Been here a long time (joined back in 2014). I'm currently working on the Infosec sector (mostly fintech), been at it for around 5 years. Would be interested to help people out with technical questions they might have! Passtimes include making my own honey mead (might divulge my secret blueberry mead recipe if accepted to join, think about that) and escape rooms.

I've crossed paths with Pink LSZ members a few times, and you guys have been generally super chill. If any of you peeps have any questions, feel free to DM me and I'll answer ASAP.

In any case, thanks for your time!

**Chertoff** - March 25, 2022, 7:54 pm

Heya lads,

Just some wee bit of info on me. I'm Chertoff, studying my ass off in university and paying off my student loan. Been involved with HF since pretty long. I do coding now and then, mainly creative writing as the best skill I'd say I have. If only I could apply that over coding. Always been involved with learning new things! And of course, getting better at badminton (best sport, no questions asked).

I come and go at HF but I always lurk around. Don't post much and only when needed buuut hey, lurkers are important too aye? Fun fact, I'd never come to HF if it wasn't because of me raging on some random person in my early teen years while gaming and wanting to shut down the entire game server (which I did).

That's me, nothing special but I'd love to meet and know more special peeps here. I'm not a big poster but I think I'd be a good fit for the pink gango!

EDIT - Gotta say that GIF at the thread is too addicting to look at

**Jayswiping** - March 30, 2022, 12:06 am

I am new here and stuff not sure how to join user groups but after reading everything the owners seem like an actual vibe and more of a family instead of a friend, somebody you can talk to and shit but best of luck with the group and I will tell you a little bit about who I am.

About me: I know I ain't the most reputable person here and I am new but my main goal is to be active, make friends, be a helping hand, and make a few extra cash. I grew up in poverty in a small island Caribbean country but recently moved to the states where I branched into being a graphic designer, A musician, A computer repairs tech and currently waiting to take a few exams to get my CCNA cert.

I have been dealing with depression at a very young age only God knows why I am alive and I do believe he has something great for my future so all those hard times will pay off, in the end, how did I get depression? Emotional abuse as a kid growing up, physical abuse, and all of that but I am really trying to stay strong because I recently lost my sister to cancer, that shit tore me apart and I am trying to be strong. So a word of advice to all the people here, spend time with your loved ones we don't know the seconds, minutes, or hours of what can happen.

Won't say much even though I won't get accepted but I wanted to share a few things because I don't really have anybody to talk to in real life(Life of an introvert) but good luck to everyone who applied to join this amazing group and stay safe throughout the year.

**Seasoning** - April 5, 2022, 1:36 am

I'm Seasoning. I randomly thought of the name probably about a year or two ago. When people ask why 'Seasoning', I just say: "Well everyone needs some spice in their lives to make it a little more interesting." I've joined HF in 2016 back when I was pursuing my associates degree in CIS, but never been as active as I am now. I am now continuing my education again for a bachelors in Cyber Security. Growing up with a speech impediment (stutter) has made it really difficult for me to communicate with others in the real world, let alone make friends, but I've always been an outgoing and sociable guy at heart.

I've always wanted to be a part of something. A group I can feel like I can rep, be proud to be in, and be a part of a community that I can be myself in. Pink seems like an amazing group and also a good opportunity for me to be even more active and help others. I am also a music artist and a videographer, and I also like professional wrestling. I've always had this mentality where if I am a part of something, I go above and beyond for the people I'm associated with such as being more active, give my input and advice, and just make people laugh. I am also into gaming, got more into during the pandemic honestly, but now I have a great gaming PC where I spend all my time on for work and school. I usually refresh HF multiple times a day as well lol.

So yeah, this is my application to Pink LSZ. I feel like this is a good opportunity for me to be a part of something exciting, and overall just me contributing more on here. Either way, I'm just happy to be here honestly. Also, the pink color does look good.

I'm 26 years old. I'm a Realtor in the state of KY, USA. Real Estate is my passion and I love to talk shop. Teaching others and sharing experience is one of my favorite pass times. I've been on HF since 2012, became fairly more active here lately, and had the good fortune of becoming a leader in Drip. This is one of my daily routines: checking HF and responding to Real Estate questions.

I'd love to share my knowledge and experience with other Pink Members. A lot of the knowledge I share is wealth building and will make people comfortable in retirement. Only a select few will have the privilege of calling themselves rich, but that's relative to each individual I suppose. If you're open to having someone bore your lounges and SF with real estate talk I'd love to be a part of your family.

[Komodo](#) and [skull](#) are very nice members of Pink and suggested I change my application. To reflect on how I truly feel. I didn't think this was a serious group at first, but I can see you all take pride in being a part of Pink. That's really cool. Being a part of something that others take pride in and consider an additional family is really cool.

If there's anything I can do to help anyone, inside or outside of the group just private message me.

Thanks

Okay, I'll give it a go.

I am 33 years old, I spend a majority of my time playing videos and studying up on digital security practices. I am very active in crypto currency circles and up until about two months ago I was mining Ethereum. I play a ton of video games. CS:GO, Apex Legends, Dead by Daylight. I enjoy spending my time while playing games streaming on Twitch. I enjoy chatting with people sharing experiences with one another. I have been married for over 6 years. I currently am Employed at an Internet Service Provider in the states. Before that I worked for one of the largest cellular providers in the United States. I enjoy helping people and giving back. I'm an open book and willing to discuss almost anything with in reason. I've been a member of HF for quite sometime. I just like others have made mistakes but prefer to spread positivity. Kindness is free and the small kind gestures you make affect peoples daily lives. I like to affect lives for the better. Once you hit your 30's you realize the kid/internet drama just isn't worth it.

I hope to maintain activity on HackFourms, I always seem to come back. I'm hoping to join a group. Previously on HF I belonged to a different group. So I know how amazing it is to belong to a group and share knowledge with one another which is what I ultimately hope for.

Thanks for taking time to review/read my application and brief description of me and what I believe/stand for I'm happy you took the time to consider my application.

I've seen a lot of PINK members around HF and they're all pretty HQ.... Here's my shot:

I'm a 26 year old 3rd year uni drop-out; pursuing entrepreneurship.

Programming has been a big part of my life, picking it up from the age of 14 and literally quite haven't stopped since. My speciality is Web Development and my go-to languages are PHP for the backend and jQuery for the front. (old school, but works wonders).

The grind to build SaaS projects (Software as a Service) has definitely been the most stressful, depressing and downright sad when reality kicks in and your projects just don't do well.. I don't give up. I move on to the next until, finally, shit starts paying off. :)

AltPump.io is my latest successful venture start up. It's a Crypto related trading bot that currently only specialises in pump and dump participation. It's gaining traction fast and i spent over 1.4 years building it.

The goal in my life is to build an unlimited stream of income while only outputting a small amount of energy once the ship has taken off.

I think i am close now.

As for HF, I've been here well over 10 years, and if you check out my first thread, it's a PHP help thread. I owe a lot to this Forum, I wish I participated more in my earlier years, but I wana make up for that now.

Thanks for reading me app :)

I was once known as Sir  
High King of the Quill  
Lauded throughout the lands  
And no mere amateur

Now I am Douchebag  
Number 145  
Returned to the flesh  
But under that of a slur

My goals are much meeker  
My temperament much merrier  
My profile much sleeker  
In some ways, a combination much scarier

All my friends are dead  
I'm looking to make some new ones  
Pink LSZ  
Appears to have some cool ones

You've heard of the pink tax  
For womanly goods  
Well as a certified douchebag  
I really think you should

I don't have much more to say  
Except that I am fun seigneur  
Whose posts will bring pleasure  
And no more, a wiki saboteur

I'd love to share my knowledge and experience with other Pink Members. A lot of the knowledge I share is wealth building and will make people comfortable in retirement. I'm 28 years old. I like playing mobile games (strategy games fit me) and watching action movies. I started to learn a few coding languages while I was in university because found out it's my favorite field and I really love developing mobile applications and PC software as well. Usually, I spend enough time on YouTube and watching educational videos about my job along with some funny videos (most hidden cameras). I joined a network security company a few years ago and it's helping me to improve my skills a lot. Also, I do some coding projects outside the company.

I know a bit about crypto technical analysis and invest a part of my income in crypto, not a pro at this, but yea.. make good profits time by time.

I met my girlfriend 3 years ago and her favorite color is pink, so I really like to join Pink LSZ because my heart is pink. I know it is a group where I can learn many things and it will take me forward. Also, I would like to help others as well and share my knowledge with them. I see pink guys' posts everywhere on HF and I can imagine how cool is the pink group.

I would like to be more active on the forum and the Pink looks like a great community to spend my time.

Thank you.

Oh man, been so long since I have made any kind of post here. I am Harlem/Taylor, a 27 year old IT technician from Arkansas currently. I have been off and on active on the forums, and recently came back to become active again. I enjoy working with people and find that to be the best aspect of working in IT, as I can help the less knowledgeable any chance that I get. I am currently also going back to school to get my degree in Cybersecurity, as it allows me to put my skills to good use. Outside of that, I work on cars as a hobby, rebuilding motors, doing body work, etc, as well as game (like most people nowadays.)

To speak to my experience on this forum, back in around 2013-2014 or so I was in the writers for a solid two years as well as other groups at the time, and I will keep the same kind of quality that I did back in the day, along with more activity, as I am fresh back to the forums ready to jump back in.

I cannot promise to bring anything else to this group other than my knowledge, and my willingness to learn from other people as well as help them.

Thanks for the consideration <3

Spoiler ([Click to View](#))I would love to be part of your familiy.

I need a new place to be active since the sections I used to rock with are dead. + I love pink.

I'm Baka, have had other usernames in the past but haven't changed since 2016. I'm a pretty open-minded person when it comes to religion, sexual preference/orientation, I feel like there's a place for everyone. I don't really care too much about politics in general other than I dislike war.

I'm also a gaming enthusiast, I mostly play FPS games but also like to play mmorpqs. In my free time I do graphics designing, most of the times it's just graphics for either Twitter or Twitch and learning motion designing, I ain't the best but learning something new everyday and want to improve

when it comes to graphics.

As my name suggest I'm also into Anime which I've been for about 12 years I believe, only reason I know that is because I started watching Anime around the time I joined HF.

I'd love to be a part of a place where you can discuss mutual interests and get to know new people while doing so.

In the past I've been a part of several groups, some of them are Brotherhood and animeFAN! and a group named Baka as far as I remember. Used to be active in the FPS section and the Anime section but both are pretty much dead which is too bad.

I hate drama but love to just have a casual conversation with people.

Hi, my name is Viper, I've been a long-time member on HF and recently got amnesty unbanned by Omni.

I enjoy talking to other members and participating in various forum sections, overall chilling with other members. My main section was Anime Adventures but it seems to be a little dead right now. Some of my first and longest online friends are from HF (shoutout [Zexo](#) ). I spend a good amount of time gaming, primarily Apex Legends and League of Legends.

Outside of HF, my main hobby is building custom mechanical keyboards. I've spent countless hours building, lubing, and tuning various boards. It's a small but growing niche hobby with a dedicated and kind community. My favorite part is definitely artisan keycaps. Artists pour their blood, sweat, and tears into crafting works of art. Here's an example of a Shishi and Orochi made by KeyForge.

I personally enjoy small form factor keyboards and use a 40% as my daily driver. I am waiting a long time for some groupbuys to complete so that I can finish my board. Here are some pictures of a high-end keyboard (\$1k+) I built not too long ago.

Build:Time80 Reforged by Fox Labs

JWK Matcha linear switches lubed with 205g0 and filmed with Deskey

Durock stabilizers lubed with 205g0

GMK Olivia++ Light Base

I definitely think people should try building a custom keyboard, it sounds and feels way better than any gamer keyboard you can buy. Just listen to this sexy sound test using one of my favorite linear switches (Banana Splits).

[Video: <https://www.youtube.com/watch?v=8ZwmdU-cgY4>]

I could ramble on all day about keyboards, but I'll stop here before I get too carried away. Feel free to contact me about any keyboard-related stuff or share your own builds.

What was I originally talking about again?

A little about me!

Joined the Marine Corps straight out of high school. Served my time honorably, had two beautiful babies. Shortly after my baby momma cheated on me with my best friend. Therefore I have no irl friends besides my kids and my current girlfriend. I'd prefer a group like this on a forum like this because honestly I have trust issues irl now. I'm not that interesting and honestly I don't have many skills, or I haven't found my skills yet.

I ultimately would like to be around like minded individuals and be apart of a family of sorts.

Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

So bumping via bot is okay, but bumping by actual group members/leaders is considered some LQP contribution? Does this logic also run true within this group, let alone every group?

God, things have changed so damn much over the years.

At the top right of your threads, you will see an icon that, when clicking, Stanley replies to your thread and bumps it back up to the top.

This was added as part of an effort to reduce the number of low-quality posts and reduce the number of bytes in circulation. People should be using this feature to bump threads instead of replying with meaningless posts.

God, I have been out of touch with even major changes for years. Introduction of Bytes gave rise to issues like meaningless bumping, but given the bumps are paid for they're passed off. Got it.

I'm 28 years old and my name is Daniel. I have been a member of HF for a very very long time. A good portion of my history on this forum has been wiped permanently (I had thousands of posts). I was in very old groups like Black Knights (2011) and was a big part of smaller coding groups as well. Over the years my skillset has become general and for that I find myself to be a jack of all trade and truly a master at none hahaha. However, that being said I love learning and communicating to fellow like minded individuals and sharing knowledge on potentially profitable ideas. I have been coding since 12 years old and love to work on video game related projects nowadays.

I have been a member for nearing 12 years. My account was compromised & repfucked in 2013 when I left for the US Army. When I was discharged from a heart surgery and muscle disease I had a lot more time on my hands... So it was time I had fired up the old HF.. only to find out some teen in Arizona was using my account as a sneakerhead LOL... Anyways I'm back and excited to start a new chapter on Hack Forums and I hope I get the chance to join your amazing community!

Lmao.

Anyway.

I've been a member since January of 2010. Over a decade on here. I've watched countless groups come and go and this one seems worth joining (for once).

I took a hiatus from HF for the last year, but overall, I'm known for my music production, alongside legendary threads in the Anime Adventures subsection.

Upon my return, I've noticed countless of you pinks in my section, and I'd like to join to see what the hype is truly about.

So, about me:

I'm an oldhead. Been here forever. Longer than most of this websites current userbase have had a computer, or in some cases, coherent thoughts.

I'm fluent in C#, C++, Python, BASH scripting, and php.

I work for a pretty prestigious company and handle linux systems administration related tasks at said company.

When I'm not coding, I'm building websites, graphic design, or making music (Mostly Drum & Bass, Dubstep, Trap, and Orchestral music for my side-project, but recently delved into the lofi hip hop scene and loving it.), I'm probably gaming my ass off. PC only. Console's for plebs.

Games that I frequently play:

Escape from Tarkov

Final Fantasy XIV

Skyrim

Phasmophobia

And just about any JRPG that's worth a shit.

Aight, well, since me claiming to have pegged [Zexo](#) didn't work... I've been an off-and-on member of this forum since 2008. I was most active between late 2009 and late 2012, especially when it came to groups. As time went on, my interests shifted and I moved on from the forum. I'd come back from time to time but it wasn't until this past year that my interest in being a part of this community really renewed. It took me a while to start trying to build any types of connections with people, mostly because I wasn't really sure where my life was headed. At this point though, I know I'm looking for some communities that I can dedicate some of my free time to.

One of my favorite aspects of HF back in the day was groups. Used to be a leader of a few groups. If you were around back then, you probably saw me being some arrogant shit at one point or another. Anyways, I won't lie, groups becoming a paid thing definitely soured my opinion of them for a long time. But, here I am now. I'd say my opinion has more or less changed. Joining Drip recently has helped push some goals in a professional sense to the front of my mind and I'm happy to be a part of the group, but Zexo's told me y'all are a pretty fun crowd and it'd be cool to have a laid back group to socialize with too.

Anywho, hope y'all let me in.

Hi. I'm a 23 years old young man from United Kingdom. I run a business in real life where I make around 400-1000£+ daily I built this from nothing and today I don't even have to do anything I just sit at home hence all the spare time I have, recently became a first time father so I'm at home a lot hence why I would love to join the pink gang, on everyday and would be repping the group to the absolute fullest. Please consider me thanks

I'd to apply again following the vouch from Nintendo 64.

I am a social scientist, one that focuses on the economics of developing countries and specializes in assessing shadow and hidden economies such as the North Korean shadow economy which is based on profits from their global criminal syndicates pushing drugs, weapons, and the facilitation of the transport of illicit goods.

I am an HF Writ3r so I am involved within the community and I would love to bring my expertise to

Pink LSZ. I am an avid gamer (PC and Console) as well as an intense Star Wars fan. I would love to bring my expertise as an economics doctoral student to the group as well as in general make friends within the group. I hope this application is able to be viewed and assessed properly as I have applied before.

I would like to join your group actually, so here is a little about myself. I'm a newbie in tech, I'm working towards being a bug bounty hunter (ethical hacker). Right now, I'm learning python. I'm making some pretty good progress with python. I like art, reading and learning. If I'm too geeky for your group, I can totally understand.

That's good because I'm a newbie with tech in some areas but I'm an old-head that's been on this board since 2012 and I like how it's made me understand a lot more about cyber security. I have a masters degree with honours in an arts subject. I have a hobby of learning about all the different ways to make money online and I work entirely from home. I am um.....not a man. Oh and I've been

into the internet since 1995 so I'm very much an oldhead with the internet as well as Hack Forums and it's amusing to me that it took fucking Covid to get so many people in my real life to finally know what the fucking internet was. What are some of your past accomplishments/contributions to HF?

Well, basically some of my past contributions to Hack Forums would be helping users with Social Engineering, Marketing, Game Communities and much more. I did however take a break from Hack Forums for a while to focus in on my real life out side of the forum.

Are you particularly skilled in any areas?

Yes, I would say I am rather skilled in Human Manipulation/Social Engineering and Digital Marketing.

What hobbies and interests do you have? What do you do in your free time?

I love to go hiking, fishing, biking, marketing online and most of all video games. Most of the free time I do have outside of running my own car detailing company would for sure be spent on a lot of Video Games just to take my stress off of my shoulders.

We want to get to know you. Tell us a bit about yourself and why you would be a good fit.

Well, I believe I would be a great fit because I am a hard worker and have a lot to offer knowledge

wise to the group. I am someone who is willing to do what ever it takes to help someone when they are in need and I believe this trait is important when being in a group. When in a group I believe we work together and if we worked together we would for sure all work in harmony and get a lot of things that are beneficial done for the group and for our individual selves as growth. I believe I would be a perfect fit for the group because I am what's missing the the group. I got energy, social skills and most importantly I am someone that can get along with members quickly and that's very important when joining a group. I would be active and make sure to satisfy all leaders of the group by contributing valuable knowledge and methods for members to benefit from.

Lastly, thank you for reading my application.

My apologies I reposted my application because I was once in the group but due to inactivity I was removed which is understandable. I did assume these were the same questions to the application so I did repost my app as the answers wouldn't of changed. However, if need be I'm more than willing to do a re application with the new questions. My sincere apologies.

I am a business man, I like to make money, I like to get into various projects and succeed in them and work as hard on them as I can to make them a success.  
I'm a dedicated person to whatever I'm doing in the real world or online. I'm a go getter.  
I like to get things done. I also believe to try to be the best person you can regardless of where you go in life and good karma and energy will come to you and bless you back for all the blessings you give.  
I'm a simple man, yet a complicated one at times and I believe whatever you do go hard or go home.

in LSZ and repping the PINK till I die haha.

What topic did you choose? What are your ideas regarding that topic?

GFX and Gaming because that's what my life revolves around half the time online.  
I think LSZ doing gaming tourneys, gaming giveaways like buy a free video game  
for a member in need or less fortunate members in need a game would be super cool.  
Or do a Looking For Group type ordeal where members get together and play games together.  
Bring the HF community closer or upgrade a legit vendor who doesn't have enough money for  
an official vendor badge and all chip in for that. Just the small little things that make the world

Have any idea for event you would like to host with the help of the group? Please describe it to us.  
Free Video Game Day Giveaway (Chose a Member In need to Gift a free Video Game to) <--- imo  
good idea, gave away \$10,000 dollars  
locally in my town worth of video games in the summer of 2018.. Everyone loved it!

We want to get to know you. Tell us a bit about yourself and why you would be a good fit. How do you see a day in Pink LSZ?

I am a business man, I like to make money, I like to get into various projects  
and succeed in them and work as hard on them as I can to make them a success.  
I'm a dedicated person to whatever I'm doing in the real world or online. I'm a go getter.  
I like to get things done. I also believe to try to be the best person you can regardless of where you  
go in life and good karma and energy will come to you and bless you back for all the blessings you  
give.  
I'm a simple man, yet a complicated one at times and I believe whatever you do go hard or go  
home.

I'd like to join Pink LSZ to make some new friends and connections on HF.  
Was referred by Immortal me and him kick it off in chat, laughing, talking and joking around  
with the HF community on there. I see myself working on various projects, talking and making new  
friends and connections  
in LSZ and repping the PINK till I die haha.

What topic did you choose? What are your ideas regarding that topic?

GFX and Gaming because that's what my life revolves around half the time online.  
I think LSZ doing gaming tourneys, gaming giveaways like buy a free video game  
for a member in need or less fortunate members in need a game would be super cool.  
Or do a Looking For Group type ordeal where members get together and play games together.  
Bring the HF community closer or upgrade a legit vendor who doesn't have enough money for  
an official vendor badge and all chip in for that. Just the small little things that make the world  
a better place ya know? There's all types of ideas you could come up with.  
skilled in video editing? based

my passion bro

Pay for things for your group? ? ok sir. Don't forget where you came from and how your group even got some of the perks it has currently

Mf expects mfs to pay for leader spots and group perks for his group, typical broke boy mentality.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,  
Stanley
