This account creator does not use 2captcha balance , so you are creating bunch of accounts for free(no other tool on the internet like this)

Fi?is - January 24, 2022, 10:31 am

Hello, your bot works with snapchat API directly ?

Raymond - January 24, 2022, 2:44 pm

This one yes, however once accounts created a) you have to login into them b) you have to unlock them

It uses a hidden api not mobile tho

Captain Pre - January 24, 2022, 3:40 pm

Uses api and dosen't require 2 captcha? Woah.
GLWS impressive.

\$neaky - January 24, 2022, 3:58 pm

Pretty cool features, I would cop it if I had had some loose funds laying around, sadly I don't.. but an advice to OP, record a video of it in action and add it in the thread. Let people see how it performs and so on, gonna be easier to sell. Anyway, GLWS.

Thank you, will do .

The only thing with this code is that accounts are locked at the beginning and all you have to do is unlock it.

Other than that there is no other flaws, I will record vid and post ASAP

[Video: <https://youtu.be/afmFGkQIECc>]

This video is just for a couple of accounts. We can run more (but my proxies are not that great). When checking account's right away we are not going to see any locked accounts. However, if you keep the accounts staying without logging in you will have to unlock them in future.

<https://d.radikal.ru/d29/2201/07/00f4cf99f363.jpg> - this is how locked account looks like

Raymond - February 3, 2022, 3:05 am

No further fixes/ additions will be made

Price of the source code changed to
700\$ Final offer.
