ReDeX2587 - January 23, 2022, 1:15 pm

The OP responded very fast, the domains I have received from the OP had sqli which were not that sophisticated to exploit. The sites seemed pretty outdated the OP probably dorked them. however the OP seems to be true what he says in the post. On the bright side I got few box to pwn :3 can vouch.

TeamAndroid - January 23, 2022, 7:01 pm

[Cyber "Max" Shaman](#) you posted this thread in the Marketplace. If you're selling these in this thread, then I would recommend removing the vouchers from the OP as all vouchers need to be linked to a contract and with the "contracted customer" badge next to the post.

If not, then get a Staff to move your thread to the free giveaway section.

Quite the interesting thread! I've been meaning to look into some Discord-related exploits & I've been meaning to learn some myself.

Suppose I pay you, or whatever it is you'd want, could I get some form of writeups that could help me understand how to approach exploit hunting and such in general? With an emphasis on Javascript & website, I suppose as it is relevant to the aforementioned I want to look into!

I may be inactive for a few weeks after posting this as I am working on a project and I find myself busy, but I hope to hear from you soon & I will do my best to reply swiftly!
