Thread: [LimeRAT Dont Work..](#)

FinishThem - January 22, 2022, 8:14 pm

to make sure we understand each other so my ports are opened and the firewall/WD are fine.
Quasar is working.
AsyncRAT and LimeRAT dont.
in LimeRAT maybe i am missing the part of the Pastbin.
i put it like in the tut and its says wrong format.

thanks.

jmark7 - January 23, 2022, 1:48 am

You can either enter IP or use pastbin, its same as quasar rat.

thank you for answering.
in LimeRat you cant use IP. only pastebin as "DNS".
if you do put your IP or DNS in LimeRAT. its says wrong format or something else..

My bad then.

Third Eye - January 23, 2022, 1:59 pm

I think it says wrong format even if you put the right format, but will work. You're welcome :)

u sure u pasted the RAW link? also it should be.

YOURDNS:PORT or YOURIP:PORT Make sure to use RAW paste bin link,
