Thread: [Is There a Way to Make Little Animation for Signatures Directly on Photoshop](#)

zogra - January 23, 2022, 2:36 pm

So I would like to make little animations for thread designs and signature, is there a way to make these kind of animations on photoshop or do I need to do them on After Effects, if so what do I need to look for?

Israinsolutions - January 24, 2022, 12:40 am

Very basic or little animation is possible in Photoshop to create a GIF.

For advanced or more transition/effect animation, go for After effect.

Yes, you can do small or more advanced animations. All depends on your skill level.
