What's Your Favorite FREE Money-Making Traffic Method for 2022 & Why?

It seems a lot of free traffic methods have gotten better since TikTok came out with quick videos. Now there are Instagram Reels, YouTube Shorts, Pinterest Idea Pins, then Facebook also shows reels from Instagram as well.

I like Tiktok since I can remove the watermark on snaptik . app and distribute the content among the other social platforms. However, it's not my favorite. My content keeps getting shadow banned on there and it doesn't allow me to message anyone unless we follow each other first. The quality of leads also isn't as good as the other platforms. Not to say, you can't get quality leads there. You still can.

To me, it seems Facebook, and IG are great platforms to get personal with your audience. More so Facebook through your profile and groups. For affiliate marketing anyways. Facebook Marketplace & Shops are also great for eCom.

I'd have to say my personal favorite is Facebook right now.

I also know there are a bunch of methods that I haven't mentioned and this can be different for everyone.

For Yourself Personally, What's Your Favorite FREE Money-Making Traffic Method for 2022 & Why?

Yes, I love YouTube as well. It's great for the long-term and tools are really making it easier to create high-quality videos. You also can't beat those conversion rates. I've also discovered some new strategies recently that I'm excited to start trying out for myself.

Thanks for sharing ?

Are any of these methods still working or have they cut the payment method too hard?

And can you tell us more about these strategies?

I have been using Print on Demand and made about \$2000 with it but not quickly. lol But also not putting in a lot of work.

queenniki88 - *January 14, 2023, 8:41 pm*

i would like to know about new methods

blueghoster - *October 24, 2023, 12:27 pm*

I have had success with cross social media posting viral videos on certain topics, for example getting a viral tiktok vid and posting in Facebook reels and Instagram and Youtube, this can be done without a watermark using an app called clipgrab for Instagram, Youtube and Facebook, and for Tiktok videos without a watermark use this online tool

[no watermark tiktok downloader](#) also use photos from pinterest for all platforms.
