Thread: [CSGO looking for radar hack.](#)

ukendt13 - January 26, 2022, 12:57 pm

As the title says. I'm looking for a radar hack. I'm going to use it for a private league. It has to be 100% VAC proof.

And It has to be running, so I can use it on my phone while I'm in-game.

HMU.

I haven't cheated in CS:GO in a while, but IIRC, PerfectAim has a multi-hack that includes a radar that has been UD for a few years.

Pretty sure this needs to be updated, but it's going to probably be out of your ability to set up if you are asking someone to make you a radar hack. You can achieve a radar hack by patching a single byte if I remember correctly, but not with external display capability.
