Thread: [I can help you with almost any task related to IT or cyber security](#)

sirpopito - January 26, 2022, 2:55 pm

Hello everyone,

Newbie here! So if I've posted in the wrong section, please advise me.

Right now, I'm working a full time job as a Software Engineer, but as I still have lots of free time, I would like to earn an extra income. I've been working in the IT field for almost 8 years. I've developed software in many different programming languages, mainly in JAVA, Python and C#. I've also worked in the IT security field doing pentesting exercises, vulnerability assessments and system hardening. In my free time, I'm usually involved in game hacking or malware development.

I'm also a deep procrastinator and I would love to lose that trait. I've been trying to provide gigs in different websites like fiver, freelancer, upwork, etc. But for some reason, the gigs seem to have no traction at all. I'm a bit lost on how can I start.

I've seen some of you asking for small tasks that I would likely be able to do with ease. So I created this post to try to reach people that would benefit from my expertises.

If you need something to be done or if you can provide some guidance on how to start my freelancer journey, please shout.

Sincerely,
sirpopito

Vouch for this user.

Helped me with a difficult technical task in a small timeframe.
User was able to create an excellent solution in python for my needs.

Very responsive, dont hesitate to deal with.

Hello i was wondering if I could hire you to help me out a bit? Can't send a PM yet because of this stupid 25 post thing.

sirpopito - February 3, 2022, 4:44 pm

Sure, I can try to help.

Hit me up on discord: sirpopito#2698

Just leaving a vouch for op here. He has helped me with 2 different tasks and was able to over deliver both of them ahead of the deadlines given. Don't hesitate to work with him!

Big vouch for this user. He helped me. He reverse engineered a file and found useful information about it. He know what he is doing.

Thanks again

Just wanna say, he is the real deal if you need any coding tasks done. He helped me a lot and very friendly. I will be coming back for more, do not hesitate to try him out guys! He overdelivered and is very professional. The quality of the work ive received was top notch. I am glad i managed to get in contact with him. If you are unsure because of the newbie status, just try him, you won't regret it. I guarantee that!

SecureOp - September 10, 2022, 10:27 am

This guys is quite solid, reached out to me pro-actively to assist with something I was in need.

Wasn't even IT / Cyber related but managed to refer me to the right direction, thank you [sirpopito](#)
