Thread: [\[BRAND NAME REMOVED\] account ghosting right away?](#)

matrixxred - January 26, 2022, 4:10 pm

Hey guys,

Just getting back in the [BRAND NAME REMOVED] game. Created a web based account with good mobile proxies and photos, ghost.. Created an account from iPhone with mobile IP and Instagram screenshots with geo tagg added, ghost. No SC in bio or anything. Can someone throw me a bone and let me know why I am running into this issue? Do I need to make the photos more unique (picture of a picture etc) ?

Does it take a few hours or days to start getting matches on accounts?
