I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Are these legal methods or do they involve blackhat activity?

And how has your experience been with mining on these servers?

?Border?ineExtr(A) - February 23, 2022, 11:53 pm

(Feb 23, 2022 04:50 PM)Xest Wrote: [\[CITE\]](#) Are these legal methods or do they involve blackhat activity?

And how has your experience been with mining on these servers?

These are 100% whitehat methods and completely safe. In fact, my main account is under my real name & information.

I've been mining for about a month now with great success - I've been able to set-up a comfortable passive income stream by mining ETH on AWS EC2 servers (\$50-\$100/day). I'll share the guide with all the customers of this product.
