Most of them are not infected and the reason you are losing bots is because you came to me without a stub asking me to crypt it for you with a public stub. I am a bot service not a crypt service

You would need to pay for a dyncheck daily account to get runtime.

i am starting to believe op is a scammer

I dont think op wants to br a scammer. It just so happens that he is about as knowledgable of malware as a marrocan donkey, and decided to resell some loads he found on a russian forum that i pointed him towards.

The reality is ofcourse that this is not that simple, and the fact that he even offers to use a public stub, and then run loads, shows it all. Had he had any clue he would have known already that ur result would have been horrible. And thus leaving you here dissatisfied.

OP may believe that he is a malware expert, but a 5 minute chat is really all you need to debunk that.

Im sure the loads are real tho, considering i know where he get them, but i sense that he will soon learn that reselling some stuff wont get you far without the knowledge and care to also provide a good service.

if it was a good service i would buy it again

Like i said 100 times, i know my stub was not fud so i contacted OP first and told him it was not fud then he told me that he could crypt it for me (ofcourse he will, thats how he is gonna make his first sale)

so i accepted it, then i tested the crypted stub on my virtual machine which is still working

i knew the risk and took the risk.. i dont care about the money
if your service is shit, i have to tell my opinion about it, and let other members know about my opinion

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump.
