??????????????? BEST Cloud Computing Service ??????????????  
- No One Wants To Tell You About -

Hello Guys, today I'm presenting the best Cloud Computing Service from different aspects, including cost, quality & reliability,  
Provided by a leading Cloud Company focused on VPS/RDP Hosting and Cloud Storage services. We are offering competitive pricing & quality in this range to customers all over the globe. They are trusted by hundreds of users, favored by dozens of customers, service providers, and partners.

The Cloud Computing Service "RDP|VPS Hosting" is currently divided into two systems:  
Legacy System:

The legacy system is an old system operated by OVX applying Hyper-V-based server hosting for years until its first retirement on November 2021, with availability decreasing, reaching its EOL shortly.

- Core Features
- Extremely Cheap Pricing
- Special Decreasing Stock
- Selection of OSs (Windows&Linux)
- Auto-Email Delivery of Order
- Bulk Ordering Availability Hard Limited
- 6 Locations - 3 Plans Specs of 1 Month Subscription
- Hyper-V Server VT
- Starting from \$6.99/mo
- MORE

Upgraded System:  
The upgraded system is the recommended system that offers updated, more improved, and Highly stable QEMU-KVM based server hosting and the most customizable - officially operated by OVX.

- Core Features
- Cheapest Pricing Over Competitors
- Available Worldwide
- Multi Payment Methods: PayPal/Credit-Debit Card/Bitcoin
- Ultra Stable System at 99.9% Uptime Warranted
- Wide Range of OSs + Custom OS Option
- Up To 8vCores Ready Specs + Custom option
- Control Panel
- Anti-DDOS Per Host Level
- Network Speed "Internet Speed" From 1Gbps
- Unlimited Bandwidth in Europe & North America DCs
- Qemu KVM VT
- MORE..
- Starting from £\$€ 9/mo (multi-currency)

-----  
As the upgraded system is still in Beta and progressing, the Data-Center locations are limited and consists of 1 UK DC location available.

6 Data-Centers in the legacy system are: US-UK-Netherlands-Germany-France-Singapore  
1 DC location | 5 Incoming in upgraded system are: UK | Germany-  
US-Canada-Australia-Singapore  
Coming Soon timeframes vary--- the probability of more locations in upgraded-system.

-----

You may have a good concept of this cloud computing service right now,  
but what about the cloud storage service? Don't worry; I'll be making a whole thread for that as long  
as this or more.

Q. How can I trust OVX and know it's legit and trustworthy?  
A. Kindly check the default feedback based on the official feedback page and the Discord shared  
on the website (\*DM Discord Feedbackers).

Q. Why is pricing way cheaper than others?  
A. Because the Company believes in quantity with cheap rates not minority with expensive rates.

Q. Is order delivery automatic in both systems?  
A. Yes

Q. Can I get a trial (vouch)?  
A. OVX Does not offer any free trial by default, all plans are prepaid subscription base, and I cannot  
provide either as Company has been running for years, is trusted in its domain and have a sales  
department. Contact Sales Only Dept via TG.

Q. Can I request a custom plan for my custom usage?  
A. Custom plan approval depends on your purpose and usage. Yes, you can via their support

channel of your choice, directly discuss this opportunity with Sales.

Q. What is your relation with the Company?

A. I'm an authorized ambassador in partnership of sponsoring the cloud services they offer for assets.

Q. What if I have an issue? Do I post it in Cracked.io Deal Disputes as a report?

A. No, doing so will result in my report of the dispute and result in subscription termination if applicable. As this is a non-direct presence and will only complicate the relation between you and them, you are advised to directly open a support ticket for resolution directly. Please don't start a dispute here, It will only be against I directly, the ambassador. Amicably fix your issue with OVX company without intermediary otherwise dm before further actions.

-----  
\*\*Highly important notes:

\*The Entire service is protected and governed by the Company's Terms of Service, Acceptable Use Policy & Privacy Policy mentioned below.

\*Your usage upon subscribing is bound to the above terms.

\*You're welcome to direct message me here for any general question I may assist, otherwise for any other case promptly and directly contact them using any channel below or on the Official Website.

\*Missed points, details, or links is very regrettable. Inform me by a message and I'll add it when possible for your convenience.

\*Volume bulk-ordering discount available currently for December on the official website.

\*As legacy-system stock remains available as actively reported by them, you are able to order any legacy system plan presently.
