Thread: [Huawei phones?](#)

**FlyDi** - January 30, 2022, 2:32 am

Hello fellow members, I want to buy the Huawei Nova 5T, it does have google play, but I have a question I heard huawei is banned from some countries does it affect older huawei phones like Huawei Nova 5T that have google play? It comes with something called EMUI, so if someone can answer me my questions, I would be happy.

Sincerly,

FlyDi.

Can I get some replies here?

**TeamAndroid** - February 2, 2022, 10:59 am

Last I checked. And I'll check to verify and let you know huawei "banned" was from Google not allowing them to run Google services and allowing access to the Play Store.

EMUI is the UI the phone uses. Like how how Samsung uses TouchWiz.

Yes the Huawei that were released before the ban will have access to google play services until support is closed by Huawei :)

Which kind of support? You mean EMUI.

1. What is EMUI, I have an idea of what it is, but I still want the question answered.

2. What kind of support do you mean?

Thank you

Sincerely,

FlyDi
