Thread: [which crypto easily to mine on machines?](#)

danieal356 - January 30, 2022, 10:24 am

which crypto currency is best option if i want mine it on different machines with crypto miner??

i legally own these machines at my private workplace

Ph4n70M Phr34K - January 30, 2022, 12:33 pm

ethereum on GPU with 6gb+ vram

erhereum classic on GPU with 4gb+ vram

RVN or RTM on CPU

Eladictococy - February 2, 2022, 7:48 am

Is crypto mining still a thing and profitable?. I am surprised to know this.

tertily - February 2, 2022, 2:54 pm

what about monero? can that be profit mining?

BrRa07 - February 2, 2022, 5:27 pm

I recommend SUMOKOIN for cpu, and CONCEAL for gpu.

If the the miner you are currently using supports it, the most profitable right now is ETC. However, while CPU mining you can use XMR although the results aren't as good as they once were.

You can use a loader to handpick the "good GPU" clientele into your miner as your uninstall rate will gradually drop depending on your miner and how detected it is.

a website called cryptunit, and they also have the whattomine website, which lists the most profitable cryptos to mine.
