this is the md5 hash string:

1) 2ae10b36b4270210b74e7087b73a0531

2) e53928b89cd9b91d1250d8fc4ea45162

May God Bless U In your life.. May U get rich too..?

I'll try to crack them but can you give more information on them? Like where you got them.

why do u want these cracked?

You can't "decrypt" a md5 hash. You can however crack the hash with tools like LHC (Lightning Hash Cracker) which is one of the best tools to do it.

Try using some online decrypters.

If the passwords are common. They should work!
