Thread: [NFT MONEY MACHINE ~\\$1k DAY PROFIT ~ UNSATURATED - VOUCHED!!! - START MAKE MONEY NOW](#)

Gordinho - January 31, 2022, 1:37 pm

Hi, welcome to my topic, thanks for getting here!

Over time I've been making good profits with the new era of NFT's, so I come through this to make the offer to sell my methods to you, because many people are asking me to sell!

I would like to say that everything is based on how to properly use the internet and nfts to make money, it's not something miraculous, you need to know this first!

In this method I will teach you how to really make money in the NFTS world and the BEST TIME is NOW, because every market is down, so the more cryptos you make now, the more money you will have in the future!

day profit 02/14

invested: \$60

Profit: \$2500

old profits.. (not all)

Is It Whitehat ?

Yes, this method is 100% whitehat and legal.

Does the method consist of CPA, PPC, running bots/scripts, writing reviews, gambling, e-whoring etc., ?

No, none of those.

Will this method get saturated ?

Due to the nature of this method it will never get saturated. Also the probability of earning the money is 100/100.

Method price:

First 2 purchases \$40

From the 3rd purchase the value will be \$60

Payment method: Crypto and PP F&F

Start contract if u want buy it.

Gordinho really took his time explaining almost everything from the NFT world, so even beginners can know where to start, and the best thing is, he is always available on discord to help you in every step of the way. I recommend this for anyone who is willing to try hard and earn money in the NFT world.

And is it functional worldwide?

Anyway good luck with your sales, I will follow this post very closely! Also available for a copy vouch, if you want ;)

Are there any vouch copies given out? Im very involved in the solana NFT community and I would like to write a review for you.

Stratosphere - January 31, 2022, 5:48 pm

This is veve right? You can't cash out unless you sell externally out of app correct?

I just asked him this question, this whole time I thought it was Veve related, this is a quote from him. He will fix it later he so it doesn't misconceive what he is trying to put fourth.

"it's my method of how to make profits in nft, it doesn't involve veve, I just give some tips about it and how to really make money easily with it. it's nothing against the law"

Virally - January 31, 2022, 6:20 pm

You're better off doing your own research than buying an eBook on NFTs. There are plenty of websites/youtube channels/tiktoks even giving this info out for free.

Don Cezar - January 31, 2022, 7:02 pm

I'll take a vouch copy if it's still available

Actually you may not have understood the part of "Tokenomics NFT" which is in a separate file and is the most important.

Also in which I give full support to help, and you didn't have support because I just got home.

You need to be logged in on discord for me to explain everything to you! this would be much more of a mentorship than just an ebook :)

the one in the photo is from the veve app, in which I teach you how to succeed in there.

but the method is not focused on veve, it's just a bonus veve.

The method is about creating an nft project, launching it and making it valuable and making sales!

MR SE7EN - March 2, 2022, 10:07 pm

So here is my review. Would like to start by saying that the owner had given me a discounted copy which was thoughtful.

I bought this about a week ago. So to start, this file comes in a rar file that you have to unzip. There is basically 2 parts to the claimed methods.

1st method is with VEVE. Which in my opinion is not solid because you can't redeem it for cash, only gems which you can sell on a 3rd party market but that's highly competitive. Also in this mentioned method of VEVE the seller doesn't really explain how to make the money but a basic idea and understanding of what NFTs are and what is VEVE along with information about drops and how to try and get them.

2nd Method

This includes how to try and popularize an NFT if you create one. A few ideas and understandings on what you may need to reach an audience. Then it's discussed how to create an NFT but it doesn't really say how to create an NFT, just a basic principle of what you can do in terms of multiplying the same NFT in color or skin etc but it doesn't say how or what tools you can use or anything really helpful in that sense.

Final Thoughts - This Ebook can probably be good for an absolute beginner with zero knowledge about an NFT. It will give you a bit of knowledge on where to start and how to deploy your ideas. It doesn't really show you how he makes those crazy fast profits as he claims either. Overall the book can be more instructive and more detailed but it's a okay if your a complete beginner with no knowledge at all.
