They are used for a handful of different things.

Bumping threads.

Gambling in various ways such as flipping, scratchcards, sportsbook, blackjack and slots.

Investing in the crypto game essentially the same way you'd invest real money into crypto. 1 byte is the equivalent of 1 dollar in the game.

Trying to win hackuman egg lottos and just generally playing hackuman as a handful of things within it cost bytes.

There are a few other things you can do with bytes too, but assuming I'm not forgetting anything than those are the main and or most popular things to do with them

I'm here to vouch for having had 3 smooth exchanges with [DemonAsylum](#) !

Another thing you can use your bytes for that wasn't mentioned is liking member's posts, although I wish that cost less than ten bytes.....HOWEVER.....sometimes if you like a lot of member's posts you get more than you spent back as Omni/Stamley will reward you with....I think it's 250 bytes for liking a few member's posts at random and I have won the 250 bytes three times. Basically if you like enough posts you will probably get your bytes back and more.

Another thing you can use your bytes for that wasn't mentioned is liking member's posts, although I wish that cost less than ten bytes.....HOWEVER.....sometimes if you like a lot of member's posts you get more than you spent back as Omni/Stamley will reward you with....I think it's 250 bytes for liking a few member's posts at random and I have won the 250 bytes three times. Basically if you like enough posts you will probably get your bytes back and more.

Do you accept Venmo or Zelle? (Want to buy \$500 BTC now but will be returning daily to sell and buy if it is smooth). I'm banned from cash app for gambling and we can try to use PayPal but I don't use it much so I'm worried it will freeze the payment for a week if we use FF which I assume you want. Thanks either way! Also will you be down for middleman since it's our first deal? If not I understand you have to be safe too and it won't hurt my feelings if you can't do any of that. Thanks

I think you have the wrong idea about what I'm exchanging. This thread is regarding the buying and selling of bytes, that's it. If I'm understanding correctly, it seems like you want to exchange some of your other currency for BTC? That isn't something I'm doing here though.

Just sold bytes to this user (we used my thread and had a contract there because i was too stupid to even realize this thread was here until surfing his PF after).

Transaction went super smooth, he gave me a plethora of payment options and didn't rush me one bit as I had to figure a few things out. Best experience I've had dealing with an HF user by far.

I wouldn't go anywhere else, my man is the real deal and didn't try to haggle my reasonable asking price. Hopefully I get the chance to use him again 10/10 HQ vendor

I bought a gift card from him, and the gift card he sent me was a redeemed card and could not be recharged at all. When I told him, he immediately deleted me on Telegram and deleted all the chat records.

Not only that, but I don't even have Telegram and the contract he started with me was never accepted. Hell, I wasn't even online at the time and rather just got on a few minutes ago. Good afternoon or evening, Mr. Moderator. I wanted to ask if you might be interested in buying
5,000 Bytes that I've accumulated. I have a PayPal account, although I also recently managed to set
up a crypto wallet (it's called Bitso) in case that works for you. I hope this might be of interest to you.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
