Thread: [EVE Online - Bypassing Alpha Account Restrictions?](#)

Kant Atta - February 2, 2022, 5:59 pm

Does anyone have any ideas on how you might be able to bypass the restrictions that are put into place for Alpha accounts in EVE Online?

Things I've tried that don't work: Isolating accounts into two separate launchers

Running the launcher through Sandboxie

Launching both accounts simultaneously

Things that work: Running it through a VMWare machine (super slow, however)

Two separate computers

When Sandboxie wasn't working I assumed that they must be looking at the associations between accounts, but since I'm able to do the same thing with two separate computers this clearly isn't the case.

Is there anything else that I can do with Sandboxie to perhaps further mask my computer hardware?

If anyone has any suggestions for what I might be able to try feel free to post them here and I'll give it a go.

vmware is your only solution.

Any idea on how I might go about increasing speed?
