Thread: [Need help getting venmo and cashapp on emualtor](#)

ccx15 - February 3, 2022, 9:19 am

I made a gmail , and used a US number. Also used a proxy before looking up venmo and cashapp but it's still not available. anyone knows why this is happening and how to fix ut

Hello @ccx15,

Can you reply and tell me what emulator you used, what proxy provider and how you setup it ? The problem is somewhere there, but you need to describe it a bit ...

I can advise you to change emulators, look who are good at the moment if the problem is not opening the apps.

Maybe buy dedicated VPN for each couple of venmo and cashapp if the problem is that you are getting blocked also if you are blacklisted on proxy this is 1 way to know you are fixing this and its 1 pay for moth ...

i use bluestacks , and 911 proxy. i made an email with the proxy on and used a US number from textverified , and then logged in with that email but can't find venmo in the play store

UgUnit - February 3, 2022, 9:39 am

Bluestacks is okay, but 911proxy ... i mean many ppl still says they are ok .. but i would go and buy from dw vendor good not dead or blacklisted proxy if you want to stick with proxy.

But like i said look at dedicated vpns ... worth investing if you are running windows setup.

About venmo just download .apk from internet and install it ?
