The title says it all.

We already have a betting system, why not hop it up a notch?

Most gamblers do parlay bets for better odds of winning.

So I can finally bet 1 byte and hit 10k odds :))

Limit the conditions to 3 multis and let the bytes rain :D

I bet this will blow up ?

I have considered it. But it is a problem if "bytes rain" and it floods the economy.

These are gamblers we're talking about, they always comeback to lose ??

Or limit the odds so it never exceeds "X" amount.

?

Also the coding factor. No longer have a designated coder for HF. Not right now at least.

Aight kami,

Thanks for considering it at least.
