Client's project - Hotel Booking platform (worldwide) that wanted to introduce people to the brand and educate them on all the benefits they can get by picking the right booking platform and getting the best deals possible.

Services: Design, Front-end development, Back-end development, Analytics & Copywriting.

Advanced calculator for optimal deals

Because users care about finding the best tailored options, we provided a tool that gives clear insight of what they can get. Calculator took user's input (parameters) like location, budget and number of people and calculated the best deals.

Complete account overview

By logging into their account, users could now have full insight and control in managing all their transactions, bookings and profile information.

I will update with some analytics on usage and conversion rate after a month.

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
