Didn't saw he was aswell non-upgraded ( in case we can use DM's or contracts ), and also, it's also better for me to update ( visibility etc ) so don't worry, I'll do it as fast as possible I gain some trades!

Looking for vouches from old rated members :)

Hi,  
is the crypter with private stub still FUD? What about windows defender bypass? Does it bypass the WD latest update version 1.361.968.0 for example?

The most important thing for me is that it can bypass the WD, it must be able to bypass the latest update from WD.

How much is the private stub? In the other forum, which is now closed, the private stub cost 100\$

He has 2 open Disputes, don't bother wasting your time with this, find a different provider, it'll be more beneficial to you.
