Thread: [How do you get the email or phone number associated with a twitter account?](#)

Handsome - February 11, 2022, 1:11 pm

Awhile back I had a group of friends I'd play games with, when two of us started streaming the guy got a little competitive and jealous when I got a big bump in viewership. Anyway, his girl tried to back him up and entered into an argument with me and understandably he took her side. It became a big shit fest with them raiding my chat with slurs and trying to get me banned for botting and buying viewers, which they flooded my channel with. Long story short, they went a little too far and went after my wife.

Of course, they denied this. I have a twitter account that messaged me, taunting me and my wife, making up lies and generally libeling her and me.

I'm curious if there is a way to get the email or phone number that is associated with this account. Because they use my name and wife's name in some of their tweets, I don't want to give out the name here.

Yes bro. In almost 90% I can get an email from the FB account, I can also try with Twitter
