So you are selling a crypter without a runtime scan? It is like trying to sell a car without a test ride.

Is your bypass a simple dll hijack?

Please provide scans using Dyncheck with internet set to full or use checkzilla for the runtime scans, most people wont accept youtube videos because they can be forged.

Beforely, Hello. Our webpage's backend is really secure you can be sure about that. Also, I think you should search rocket-loader of cloudflare :D

At this point i'll also include this screenshots:

This guy, pasted the website from a stresser (IPSTRESS.IN), then he said that was his old project(fake) when I said him that I knew that guy, he just said that was no more his project, but he should talk with his "frontend developer";

Just for yall info, not here to flame OP.

Yes, I'll speak with my front-end developer because I didn't make index page he did it. Also if you

and another guys need test key about security i can provide it. Just write me from telegram.

That doesn't make any sense lol, at least stop trying say bullshit at this point. Hosting? You said to me (Almost instantly, without asking TO ANYONE) that you were the old owner of that project (AND ITS FAKE) and then changed idea ; I think that there's a reason for all this weird facts, and there's a reason cause everyone is accusing you ! :)

It's not weird new member paying \$850 and getting scammed by new user like you

Admins don't get involved on deals, so you should use HF contract system for any deal you will do in here or your account will be closed.

I can tell you 100% that it's the same guy, using crack crypter to ripper people on HF since one year now.

Please spread the word so he doesn't rip people anymore.

He created another Thread that He even made sticky post.

Be safe guys.

We can't be having new account here ripping us because of crypter.

Zero contracts, OP linking to external sites which isn't allowed, overall a general mess of a thread and multiple rule violations. We're done here.
