Thread: [TECHNICAL Services | coding | linux | devops | excel \[GET HW HELP HERE\]](#)

SIM-2501407 - February 13, 2022, 11:35 am

I will complete homework assignments (or small jobs); preferably ones that i can learn something from too.

Terms are per task completed. Just let me know what the tasks are.

Spoiler ([Click to View](#))

(I am more comfortable with per task; I will not be one to charge due to my own negligence, inexperience, or lack of knowledge)

If an offer interests me and seems feasible, I'll take the job.
I am not a code monkey, but yes, I can do basic programming.

Skills:

Webservices (Servers/Hosting): AWS: Network configuration (VPC, Security Groups, Route tables), EC2, RDS, S3, and so on.

Not technical? I can help hosting services! Let's put your website or your minecraft server online!

Security: Interested in hearing what it is. I know the basics of how to defend/protect (TLS, Nessus agent, Encryption Standards, etc).

Programming (order of preference) Shell (+Bash)

Python

YAML (Gitlab CICD Pipelines w/ testing and deployment)

SQL (MySQL, PostgreSQL...)

Java

The 'I am willing, but not a fan of': GoLang, HTML, JavaScript (nodejs), Perl.

Excel: Data manipulation, vlookups, match/index functions

Solver (optimization)

Basic VBA.

Formatting Worksheets

Operating System: Linux/Unix (MacOS): File System permissions, package managers, etc.
Windows

Clarification: Generally speaking, applications can run on anything. I will not do windows powershell scripting or security.
