Thread: [Faceit CSGO cheats, do they even exist?](#)

bossman23 - February 16, 2022, 3:51 am

I've looked high and low for a few years now. I've tried Skadaros cheat, it wasn't horrible but it got detected 2 weeks in. Ekknod no longer sells. Supex0 isn't possible to get hold of. I've browsed the forums and seen no one has really discussed it since 2020, is it so rare that it is a waste of my time looking for someone legit?

I know not to contact anyone on this forum because 99% of them are most likely a scam it is more just a discussion to see if I am wasting my time even looking.

Just like you, Valve browses around for these aim-bots as well, in order to analyze their behavior and detect them.

So if you want something that works for the long run, you will need either a customized bot or a bot that is regularly updated.

From my past CS experience, it's not worth the trouble.
And if you get it working, it ruins the fun for you.

Cheating is where the fun begins. Just my opinion, like yours - not attacking anyone here

I can follow in on the fun of getting the bot to work.

Yes they definitely exist, I used to play around with it and had a cheat that would play sound in your ear to indicate where people where and wrote to physical memory xD

Theres probably some other unique methods and hardware cheats, though usually are private and foreigners make them

jack_williams2002 - April 2, 2022, 5:08 am

yes it is, i think a lot of private cheats works fine with faceit

bossman23 - June 12, 2022, 8:52 pm

Bought from brdly2007 works great

Couldn't have said it better myself.

Yes they exist, hardware ones are the best but expensive. Good luck ruining the game though.

Umbrella.gg used to sell private builds for faceit, not sure if they do it anymore, you could ask them.

Email him, it's really pricey.

Only public thing I can find on him <https://youtu.be/dBdR5mmCBvw>

Btw dont buy from brdly and all you recommend him should be getting banned tbh :))

what supex0 wrote about this wannabe pro coder

brdly2007 ist auch bekannt als "wtffbbq", "XISM" und einige andere namen auf sythe, die man alle im gebannten Zustand(Grund: Scam) finden kann und kommt aus Neuseeland. (Nutzt aber gern DK / UK proxies oder VPNs)

Er ist ein "ehemaliger Kunde"(Stolze 4 Tage) von mir, der mal jemand anderen ausgetrickst hat, einen Cheat für mich zu bezahlen (der bekam natürlich sein Geld wieder ;-)).

Vor kurzem hat er einen Nutzer auf sythe mit dem Nicknamen "chokechain" versucht abziehen mit einem "Steam Trade Ban Bypass" - nutzername wtffbbq auf sythe.

An eurer Stelle würde ich da nichts kaufen. Ihr seid gewarnt.

(... und sollte doch jemand blöd genug sein, PN an mich mit Beweisen, sofern diese zutreffen kann ich euch auch helfen)

I personally have bought from him. I am pretty sure this was a smear campaign by supex0 because brdly was a competitor to him back in the day.

Riveryes - June 23, 2022, 10:03 am

for sure man :=D who would you trust a random or a known coder, when it comes to cs cheats

Seniorluh - June 28, 2022, 2:25 pm

They exists but not in the form of how "normal" Cheats looks like.

Basically only Wh and some kind of trigger bot.

I have been hacking on the same account for 3 years now. No problems so far.
(when it comes to MM).

But it's very easy to get banned on faceit.

SetLost - August 12, 2022, 7:21 pm

Yes there is even a flaw that comes out this week again on against global offensive strike

SetLost - August 21, 2022, 11:35 pm

Hello enjoy ban soon faceit anticheat is not worse
