Join Date: 02-08-2022 and started selling crypter, it's always easy to create Thread and make a paid post and start ripping people.
you don't even know the basics that you have atleast do a runtimecheck and post.

Get some people here to test this. HF has been a den of crypter rippers lately.
Trade with caution guys.

Received a vouch copy, tested it and it is working very well. Low to none detections scan and runtime. (Private build) Easy to understand and a good amount of options to get your detections down.

Can definitely give a big plus for the support I received. Had some issues in the beginning but OP was quickly there to help.

Keep in mind this is second day of using.

But so far so good, you have a good product Zoneter! Well done and good luck with sales.

Coder has not been active since today hope all is well?

Edith: This coder is not straight forward and he is a scammer be careful guy, he will give you good and working vouch copy and after you paid for license he will send you non working shit copy paste crypt he did it to me and my friend and stop responding to us on telegram.

Don't buy it's a scam he will give you working vouch copy and when you pay him for the main license he sends you crap. Don't waste your money it's bullshit.

I have the paid license I bought from and will forward it to HF admin to confirm it's crap

Palac10 - February 24, 2022, 11:47 am

This is already looking pretty shaky. You should give vouch copy to respected members in this particular segment of the forum. There are a couple of them. @Incog is one. You should also do as NotKover has repeatedly suggested and provide runtime results via checkzilla or dyncheck with internet set to FULL .

What seems shaky, the only problem was to change the server where the files are hosted, we solved it, there was absolutely no detection event.

Also as you can see we vouched to the high members and it was tested by everyone, it's not perceived bro don't worry good forums. :)

Not sure you understand but over here, elevated membership does not denote skills, being knowledgeable or respected in a particular field. I emphasized RESPECTED member for a reason.

Don't get me wrong, you are a respectful member for me, we are all human, even if you got a vouch, your difference from the others will not change for me.

By far the best crypter I've tried in my 5-10 years of on/off crypting. It's obvious the program is written extremely well. I've literally never had more than 2-3 pick ups on AV even months after crypting, which is further proof that his obfuscation methods are top notch. Have no doubt in my mind that his excel and word exploits are equally as worthy if not better. Would purchase anything from this guy with confidence .
