Thread: [\[GIVEAWAY\] 1 x Windows/Linux server - AWS Cloud Hosting](#)

?Border?ineExtr(A) - February 16, 2022, 10:42 am

Hi guys, as you can see from the thread in my signature, I have a few thousand \$ in credits on AWS so I decided to host this giveaway.

I will choose 1 person that will receive a free Windows or Linux server (4 GB RAM, 30 GB SSD) for hosting or process automating etc. 1-2 months duration, depending on my generosity. WHITEHAT ONLY PLEASE! No blackhat will be allowed because it's against the rules, sorry guys.

Please post on this thread how you will use the server and why you need it, I'll choose a winner once we have more than 10 entries. Bonus points if you post on the thread in my signature "Good luck with sales" or something like that. Super extra bonus points if you host my signature :)

?Border?ineExtr(A) - February 21, 2022, 12:20 pm

Still available, feel free to participate.

Wage - February 21, 2022, 3:45 pm

Entering this, and I'll post on your thread.

Juoku - February 25, 2022, 12:21 am

Seems like a pretty awesome thing to host ma man :)

Posting to enter, I'd like a Linux server to play alittle with Bash and the commands to get more familiar with them.

I have a VM but a server where I can connect to via SSH and such would be awesome.

?Border?ineExtr(A) - February 26, 2022, 6:02 am

Great! Keep it coming guys, I'm looking forward to share a server with one of you.

And also if you're interested in hosting multiple servers, check out the thread in my signature. At any time I have over 50 high performance servers that are for hosting purposes (e.g. ubuntu OS), process automation (Windows OS) and for mining cryptocurrency (custom firmware).

Only a few copies are remaining - limited time only!
