SIM-2501407 - February 19, 2022, 4:46 am

This is a public lounge for the Educational Purposes syndicate crew.

Spoiler ([Click to View](#))

I am the only one in my crew.

SIM-2501407 - February 22, 2022, 2:33 pm

Crew eating chicken tonight because we are winners

Lrrr - February 22, 2022, 6:05 pm

Hey boys, what's up on this side of crewtok

Got a recommended contact for making userbars?

I was thinking of a boat and instead of having a shiny line like everyone else, I'll just have Toms head poke out of the boat.

Idk maybe i should do a contest and have a prize of like \$150.

The merger of educational purposes and the motley fools?! No way!

Kidding.

what's up with the userbar of the group?

Having a userbar made up now, just rebranded to Motley Crue like an hour ago.

The merger of the century.

Who are you using? I am just asking for a friend, of course.

jcole - February 23, 2022, 5:12 pm

Where did you come up with your userbar?

Thinking out loud.

Create the 'ultimate' bookmarks application? Select a popular website or input your own custom tag to save... drag the 'tabs' into your desired location, and the bookmarks html be created for you.

Collage as a community to create the best in-depth bookmark bars ever created. One for quick

references to useful hf threads, and another built for programming, networking, and related links.

We may be able to have chrome extension to automatically swap between templates as simple as a click of a button.

Could integrate this into the already existing HF extension. :hfx-supporter:

Because this is my lounge I'm saying whatever comes to mind.

PII ripper application.

Two Parts:

One you can drop any file type in and it will search for patterns and extract PII: specifically email, ipv4/v6, names/username, password

Host-based Data Loss but instead prevention we simply report logs. Logs can be stored locally or sent over an API.

Oh yes, this is what we have all been longing for. Long live Hacker Craft.

Is there any form of active player base? Genuinely curious if there's only like 1 person online.

If i didn't work 10 hrs a day I'd love to play a bit

I don't think it's been advertised to it's full potential as it is not finished. Currently only like 0-2 people on at a time. I don't play often because I'm scared the map will reset and my progress will be lost. Would love to work on the project with Lrrr.

I was glancing at some threads and saw your comment about wanting your own user bar. I was considering 'rent' for the custom user bar, but i don't need the extra money. LMK what you have in mind for a user bar.

In the event that I like it, I can make that happen. All I would ask is that you pay the byte fees and provide the user bar (ofc).

Spoiler [\(Click to View\)](#)

(till Lrrr requests a shift for HackerCraft - should that day ever come).

edit: though tbh i like the future software user bar
