How many invites, DM and accounts can be done before a ban?

And what's required to run this?

Is source code included and what's it build with?

Which platforms does it run on?

its built using python

yeap you get the source code too

anywhere you can run python you can run these bots.

i have not tested the bot for limits exactly, but I ran the dm bot and invitation bot with 5 accounts (no proxies) for 4 days and they gave me average of 42 messages and 36 invites each account daily. its been a week since then and the accounts are still alive

Any screenshots?

You should offer a vouch copy to get a review because of your new account.

It uses sms-active.ru for getting the phone numbers to create accounts, so it needs a sms-activate.ru's api key and proxies if you want to use them.

You should put your Telegram here.

I'm looking for something like this. Tried several other bots and they all don't work properly.
Send me your Telegram, you can do it in PM as well, and let's see what your bots can do.
