It's like spotting cars, trains, planes, or dogs, but with cops.

You mean any suspected LE/informants on this forum? They're barely here.

I'm down... not sure how this works tho?

We looking for HF snitches lol?

I've literally had member join from government using official emails. These are not active accounts. I think they join, take a peek, and move on. If someone is here to honey pot, my guess is you'd never know.

But basically LE or not I'm not going to let you run around the site making accusations at members which surely you can't prove.

Sorry but no bueno.
