Thread: [Sites to spread crypto mining malware](#)

durm34 - February 24, 2022, 12:04 pm

been posting monero silent miners on a certain gaming/leaks/cracks forum, been doing decent i think
also have been posting "cracked game hack" on youtube with less success

where else can i spread this malware? mainly malware attach to games/cracked cheat loaders etc.
only been doing this for a few days and only know of 1 forum i can post on to spread malware

am using silentcryptominer with monero and unambinder to bind programs. should i use different tools? pool is 2miners

=====

From what i understand, you cant link back to other site on Hackforums. If anyone can just point me in a good direction, itd be nice if you could leave your discord below so i can contact you. Or PM system on here, not too sure lol.

Any torrent site i can freely post to and spread to?

torrent sites are saturated with malware so you may want to look at other avenues

silentcryptominer by UnamSanctam

let know if this isnt a good option. preferably i would use open source software.

depends. it depends on the persons network and cpu model and if its on idle mining mode etc but
its really not that much. tbf, just fucking around with the miner and the bot.

Silent Crypto Miner by UnamSanctam is a personal favorite of mine. Its extremely good IMO for a
free Silent Miner. Good choice OP

lynakouba - February 24, 2022, 1:50 pm
how much were you making per day on average ?

I would definitely make sure wherever you choose to spread your miner to, you make sure you get installs from people who have good graphics cards. You can increase your profit margins big time by infecting people with powerful machines. Take a look at this to get an idea of the hash-rates you will be getting depending on the GPU. <https://whattomine.com/gpus> It also tells you which coin to mine for which GPU and the hash-rate you will get with that coin, very useful website.

Anyways, best of luck to you OP!

A bigger problem you may encounter is encryption of your Crypto-mining Malware. There are little to none services offering a encryption for x64 Bit files. You can always try Obfuscation services rather than a protection marketed as a 'Crypt'. But your results likely wont be worth while.

Try a Back-up loader to ensure holding. Or targeting bots with their AV completely turned off.

google is your best friend.

suduspoon02 - May 5, 2022, 11:23 pm

hi,

why not switching to other crypto bro because XMR you will need alot of bot. Unam runtime detection really high from my last experience even do using services to crypt it. You should consider on switching it and Yeah YT is really one way of spreading.

Tips: Learn to repack

YT works just fine but only with unique and good-looking content, most of the people just copy and paste scruffy and ugly videos and they are expecting good results, thats not how it works.

also live streaming is very good way to get organic traffic to landing page with almost zero costs.

Stay safe & keep going,

ZELOS ?

please tell us, are you selling/injecting payload? or saving people.? like what are you?

In fact, landing is not a problem, the real problem is traffic. and what's your method again?
