Thread: [white or black hat](#)

I'm indecisive on which to pick, white or black hat on Hack Game. What are the pro's and con's of each, can someone tell me?

This seems like it would fit the HF Byte Games sub forum more.

As for a difference, for now the only difference is the missions you'll get after picking which hat to be under, you'll still have the same small jobs as before but you'll open the missions tab where you can apply for a mission every few hours , get the programs for it and perform it.
