Thread: [Photo's NFT Signals \[#1 NFT SIGNALS\] + Free Mentorship | 97% WR | Earn Or REFUND](#)

PhotoGallery - February 26, 2022, 4:13 pm

FAQ:

Q: I have no NFT knowledge, and I don't know what NFTs are. Can I still participate?

A: Of course, I have guides and mentorship to help you get started. I also helped numerous members who had no understanding of NFTs.

Q: How much can I make?

A: 2x per trade is normal, but obviously you can't set a rule to this or guarantee profits.

Q: How much can I start with?

A: You can start with as low as 1 SOL (~\$85)

Q: How often do you send signals?

A: I aim to send at least one signal a day. But this depends on what's available on that day.

Q: What's the earn or refund policy?

A: If during the period you're subscribed there's more losing signals than winning you'll get a full refund.

I've been in his server for the past week, OP made some calls and all of them have been profits. There were not many good projects the past week, so calls were few, which is actually a good thing because he only signals what he's confident about, even if it means less calls. He signalled some good and hyped projects but also some not that hyped ones, and those have made profits too.

OP made a call on a project, but after seeing that the whitelist sale didn't go well for it, he informed us not to mint it and cancelled the signal, which was good. This shows OP is checking and analysing every call till last minute.

He also called some long-term secondary market plays, which is a plus point. Also, he made a giveaway of 10 whitelist spots of a really hyped project (the whitelist spots for that project were selling for 0.4-0.7 SOL afterwards) this was amazing.

But as always, anything can happen in the NFT space within a second, so always DYOR as well. Avoid FOMO. Play according to your portfolio and risk management.

When I find cool ETH plays I send them for free to the subscribers. It isn't a main activity though. I'm considering adding ETH plays as well in the future. However, as for right now, it's officially only SOL.

After 1 week here is my review:

Honestly good calls, every call he made was profitable. The community is nice and friendly.

One downside I would say is Photo does not go in-depth or say why he picked those projects specifically, so if that's what you're looking for then you won't find it here.

Overall I believe this group is worth it as the calls are good, the community is nice and there are giveaways every now and again which is always great.

I'd like to sign up for a week to test this out.

What trading platform/website should I sign up on?

What's the best place to buy SOL so I don't get a high transfer fee when sending to the marketplace you use?

And would I be able to make these trades on my phone?

1- There's no set website or platform you need to sign up for. For mints it's usually on the project's website, and the secondary market is usually on magiceden. There's a full guide available to members though.

2- Any exchange platform should work. I personally use KuCoin.

3- It's best to trade from a laptop / PC

I send signals to purchase. You'll be notified each time there's a buying signal. You don't need more than 30 minutes - 1 hour per day to do this.

I don't want to ruin your sales thread so this is my final question, sorry for questions that might be stupid. Do you have international members as well? I'm from the EU, which platform(s) do you recommend? How long is the signal valid for? For example, you give a signal. Can this signal still be profitable after 3 4 hours?

- 1- Yeah, I have members from all over the world.
- 2- There isn't a certain platform. It depends on what the signal is, whether it's minting / a secondary market play / a token flip
- 3- Again, it depends on what the type signal is.

How early from the mint date are these calls posted? It's known that most of these hyped projects have limited public spots that are minted by bots, so your chance to mint is so slim.

Hey, not all mints are too hyped to get in using a bot. However, for the ones that are hyped I often post early WL so members can mint during WL or sell the tokens. I also have botting guides for members to help with mints that are too hyped.

My week ended yesterday. OP's calls were all great. One of them even has a floor price of 17 SOL today! I could've made my money back + insane profits with that call alone. A bot is pretty much necessary though. I couldn't grab any mint because of so many bots taking over the drops. I'm sure it's possible, but your chances are very slim.

I'd love to buy another week or even a month, but I need to get my hands on a bot first.

I could've made my money back + insane profits with that call alone. A bot is pretty much necessary though. I couldn't grab any mint because of so many bots taking over the drops. I'm sure it's possible, but your chances are very slim.

I'd love to buy another week or even a month, but I need to get my hands on a bot first.

I appreciate the honest review! A bot does surely help with hyped mints. By it's not the only way to profit from my calls. Maybe if you had experience a bit longer subscription you would have been able to get some early WL or a secondary market play. I'm looking forwards to you joining back though!

I'll definitely consider buying a full month this time.

Been on another similar service, its really difficult to mint without a WL. Most of them gets sold out in seconds. And people who sell WL are way to expensive. Do you offer anything which can tackle this?

Hey, not all mints are too hyped to get in using a bot. However, for the ones that are hyped I often post early WL so members can mint during WL or sell the tokens. I also have botting guides for members to help with mints that are too hyped. In addition to all of that, I'm looking into starting an ACO (mint botting) service exclusively for subscribers. This means that you'll no longer need a bot to get into hyped mints. You'll be able to pay a fee to the botter only if they successfully hit the hyped mint for you. There's probably going to be an update on this service in a few days.

The server has been around for a few months now, and as long as SOL NFTs aren't dead I plan to post signals.

Hi, it's my first time investing in NFT so i don't want to spend too much money to try it, i would like to start with 1 SOL. Usually how many signals will i receive that i can afford to buy with 1 SOL? If i buy 1 week subscription of your service how many signals do you think i can afford with 1 SOL? Thanks in advance.

you wont be able to make any money with 1 SOL

signals called in these NFT channels are very hyped, you wont mint in public, so your only chance to mint is with a bot, these bots can cost anywhere from \$400-500 or maybe more
oh and if you want an RPC to make sure your bot is fast, you'll need another \$100

to answer ur question tho, most mints are around 1 SOL - 2 SOL, so if you buy a week, youll probably be able to MAYBE mint 1 signal, and thats if you dont get outbotted

This isn't completely true. Not all mints need a bot. Some mints happen on un-bottable launchpads, others aren't too hyped to need a bot. I also provide a guide for botting, and soon there will be a botting service exclusive to subscribers.

Anyone have luck with this yet even with the markets going down?

Stanley - May 15, 2022, 9:19 am

I'm Stanley HF's helper bot. The OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,

Stanley

Probably the worst purchase I ever made on HF.

Very few calls, and when there are some, it warns 1 hour before and in 100% of the cases, they are projects with whitelist so impossible to mint even with bot.

Keep your money, do not buy this product.
