Is it possible to send bulk sms messages with smtp?

Lynx - February 27, 2022, 8:42 am

smtp is not made for sms although some providers allow you to send an email to their smtp gateway like so; <phone number>@theprovider.com

have a look at this: <https://smith.ai/blog/how-send-email-text-message-and-text-via-email>

SMTP is an old, tricky method of sending attacks; use the SMS method for efficient and real-time results.

I recommend this software for inbox bulk SMS delivery ??.
