Thread: [FUD Reverse-Shell with web interface | R-Network](#)

mk_0 - March 3, 2022, 7:43 am

>> <https://r-network.co> <<

ABOUT

Started in 2020 as a private project, R-Network is now opening up to public pentesters. By offering a unique product, R-Network's mission is to facilitate and improve the work of pentesters.

You no longer need to deal with boring and complex local servers to host your reverse shell, we are doing it for you, and it's available 24/7.

Thanks to our unique algorithm, each payload has a different code and is undetectable by standard antivirus softwares.

PRODUCTS

As a member of R-Network, you will have access to the following options in our website:

Generator: At each payload generation, a new stub will be created, so it will always be FUD.

You have the choice between using our web interface to manage your clients, or generate your own local server and host them yourself.

The generator have the following options:

Prevent payload from being closed (even from task manager or command prompt)

Automatically start the payload each time the victim launch his computer

Spread the payload into the system

Hide the payload into the system using a zero-day unique method

The generated payloads are at least 97% FUD, but we are making our best for them to always remain at 100% FUD.

Web interface: Our web interface allow you to interact with your connected clients directly through our website.

In this web interface you will find the following features:

A terminal to execute remote commands to the target.

A file explorer UI to interact with target files and folders (this includes downloading and uploading files silently)

PS: please note that you can also download and upload files through the terminal

It is user-friendly and very easy to understand.

You will also be able to access the web interface through your smartphone as it has a clean responsive design adapted for mobiles.

SupportWe have a very active support team.

Available 7/7j.

Always here for you to make sure your problems are solved.

PLANS

All plans have full access to the platform 24/7

Member plan (25\$) -> 1 month license.

Premium plan (250\$) -> 1 year license.

Platinum plan (500\$) -> lifetime license.

HOW TO BUYBy default, we have decided to receive payments with Bitcoin in order to ensure that our users privacy is respected, and to protect ourselves.

But, we recently decided that we could make exceptions for our discord server members, and allow them to pay via PayPal.

WHAT'S NEXT ?

If you are interested in our product or to know more about us, you can visit our website:
