This ebook is about earning passive income. The ebook is 21 pages long and contains 6 passive income streams that one can invest in to earn passive income. I am personally familiar with one mentioned in the ebook, but the rest were new to me. The OP is very helpful and is willing to offer help to make sure you earn the most possible, passively. OP also has a discord group dedicated to help you earn passively from the passive income streams mentioned in the book. As always, this is investing so do not invest anything you cannot afford to lose.

(Mar 5, 2022 09:45 AM)Daniele Wrote: [\[CITE\]](#) Hi all,

I bought the eBook only version

He explains (at the moment) six methods for passive incomes.

They are a mix of safe, very safe and average risk methods. Don't expect to find some high risk Ponzi scheme in the eBook (luckily).

I knew some kind of business available in the eBook, but none of the companies or projects involved.

It definitely worth the price in my opinion.

Thank you. (May 6, 2022 06:53 AM)Cipheir Wrote: [\[CITE\]](#) It's a quality eBook.

There are methods from safe to high risk and require investment, all of them which OP have tried before selling them, OP also invited me to his discord server and he will keep updating the methods.

He's friendly and responds fast to my questions.

It's a fair price for \$100 because you'll get a lot of content + discord access.

Will comeback again after I make profit from one of the methods.

EDIT:

There's a Baked Beans alternative in the eBook and it's only one of so many methods.

However, mind you, you will need money to pull most of these off. I'll leave another review in a few months after I have tested some of the stuff, currently will use his own service and we'll see how the returns are.

Masoom - March 3, 2022, 8:27 pm

Alright so I've joined the Discord group and also did a quick overview of the actual ebook.

If you haven't caught on yet, this ebook mainly revolves around automated trading. I've been around this scene for a little over a year now, and most of the information in this eBook is pretty easy for me to comprehend personally; As noob however, you may need a small grasp on basic investment terminology in order for things to truly click.

But avoiding the learning curve one takes in order to become a proficient investment strategist from scratch is possible in this case, thanks to the resources suggested for use in this eBook. If you purchased access to this eBook with the sole interest in printing money, it wouldn't take you very long to understand the absolute minimum that's required to get going. As someone who already knew a bit about these type of methods prior to reading, I'd say that the most value here is actually the hand-selected brokers OP has suggested to invest with.

Of course, with big promises, comes great risk. This is trading, and the bots involved offer amazing ROI promises. Very high, but not something I haven't already seen. I need to run some tests to see more. I'll make a few deposits using the roadmap that OP suggests in the eBook and come back here with an update.

Thanks for the review! We always recommend to work you way up to the riskier investments if you don't have a lot of starting capital or you would like to play it safe. But we do recommend investing in all the methods to have a great balance of stability and profitability.

Remember, you should be withdrawing from the HIGH ROI opportunities often to deposit into the HIGH SAFETY opportunities.

As the thread says you'll need at least \$1000 min to make 100% - 200% weekly.

1. Nope no knowledge
2. There is little risk of losing all your investment. However because its still under the manageable risk category don't over-invest. It's much better to let it make back your initial capital and trade risk-free asap.

Purchases have been coming in! Thank you everyone that has bought so far!!

I'm really debating if I should keep the 100%/Week and 200%/week methods in the eBook FOR NOW.

The reason being that I would like everyone to first invest into the SAFER methods before going to the higher risk ones.

I will think about it for the meantime, but my plan would be that you unlock the higher risk investments after being a member for at least 1 month...and have invested at least \$1000 into the other methods. I'll also be discussing it with my group!

Of course if you purchase now, you'll still have access. I'll be deciding in a few days.

Hey all!

Continuing to update the server. New changes are live so members will focus on the safe investments!

The eBook itself goes into much more detail about each method as well as more proof of earnings, trust pilot and other reviews, social medias etc. But here are some screenshots from a few of the different methods:

There are results from some of the trading methods:

1:

2:

3: recent trades done by one of the methods

This method has nothing to do with trading:

Plus 4 more methods in the eBook, and over 8 to be added in future updates! You can even check them early in our upcoming section in the private discord.

Ballpythonlover - March 14, 2022, 5:32 am

1. Looks really nice.

2. It is again sharing of simulation. There is starting, ending date and timeframe on which it is tested.

That is why I asked for view from real trading.

3. Why you do not share PnL analysis from Binance? Single trades are not trustworthy. As you could have just 3 wins and 10 losses. Of course maybe you have a lot more wins than losses, but still PnL analysis will tell everything about profits and time in which it happens.

Thanks for the quick review so far. The 200% weekly is changed in the next update. I accidentally had some of that text still lying around and didn't realize. There are some BIG stuff happening but it's currently in beta.

It's changed to be closer to 50% - 100% monthly for now. Which is still insane with compounding returns!!

No there's no super high risk high reward. Some involve trading some no trading at all. Still never risk what you can't afford to lose.

And you're VERY Wrong about 1% a day...1% a day is 30% a month. If you use a compounding interest calculator, that's nearly 10k in a year of a \$100 Investment!!!

Example, \$100 with 30% monthly and depositing \$50/month for 1 Year:

The only way to do something like that is by passing a prop challenge and trading for a month. I'm working on that, probably by next week :)

(Apr 5, 2022 12:52 AM)Mike Price Wrote: [\[CITE\]](#) Please provide a method that we can make thousands of dollars a month while investing only \$100 or \$200

Please understand that the mindset you have is the reason why you only have \$100 or \$200 to invest.

Is 1 year really that bad? In 1 Year time, can you guarantee you will have \$10,000 to invest?

I used to have the same mindset as you and year after year I was still looking for the next big get rich quick scheme. If I had only put my \$100 or \$200...sometimes \$500 to invest, I would have been wealthy way earlier in life.

PLAY THIS GAME FOR THE LONG TERM.

That said, my reply to the first person is the only feasible method that could do that. When I release Prop Trader's Paradise, you can check it out.

I'll be putting up some more proof in a bit for some of the methods. Just been working on the next update. Now that it is out I can focus on releasing 2 more eBooks as well as pushing out more proofs. I haven't been pushing my vouch copies or purchased members to leave any reviews yet because I want them to grow their funds as much as they want to, so that's why you only see a few positive comments here and there. In a few weeks I'll start pushing for more reviews. The thing is there are so many methods that my 'proof' will only show a few of them!

I will be dropping algo empire and prop trader's paradise threads later today. Those will be super interesting!

Hi,

How come none of the reviewers/vouchers have discussed their results?

Surely if it's compounding daily and able to withdraw at any time there will already be countless amounts of excitement from these reviewers with posts vouching that the methods have indeed changed their lives?

Claims of even just 1% compounding everyday could easily be shown by everyone but haven't seen any. I'm interested but skeptical, able to shed some light on why this is?

Ask the buyers lol.

For some methods the recent crypto downturn has caused a reduction in trades for trading methods. As for the non-trading methods, because they are slower than the trading methods, I'm not

sure how many people have invested into them, though i am pushing for members to invest into those as well to make sure their risk is diversified. Some people are still saving up to invest into the more expensive methods while others are just enjoying their profits and waiting for new methods.

I think it's not bad that people haven't said much either. That means that they aren't complaining. I have about 70+ members in the discord group so far.

I still haven't pushed my members to leave any reviews yet. I want to improve the discord some more. I'm very much playing the long game with this product! If you have any questions you can message me!

This is by no means sales trashing, read the whole thing.

Seller is 10/10, he is responsive, helpful and explains things even for the 5th time, has been nothing but delightful.

The method(s) he provides are great, BUT due to the current economic downturn I have incurred a loss of 500\$ on one of them, and my account was nearly wiped out. This is NOT his fault, as it is the structure of the shitty fucking coding that particular thing has in it. I am kind of on the edge of even trying it out more, because in the first week, before the market tanked, it made me 130\$, so in essence my real losses were around 370\$. I took the risk, and I agreed to it, so that was not his fault.

I can vouch for the other methods, the ones that are more passive and require more time are of course safer, and can net you some money. The main thing about the ebook is that it mostly contains information that is either tested by him, or is harder to find if you are just searching stuff.

So I would still recommend to get the ebook, if anything, and if you are testing something make sure you do it on a paper acc for at least 1 month.

Thanks for the review. Due to that same incident I've made a few major changes to how I'm moving forward.

1. First thing first, i'll be releasing a manual trading method for the eBook next week. Requires a small investment to get TV Premium and one indicator (you've already seen it in the upcoming section of the group). This method can be fully manual, or semi-automatic, or both. Can be used for swing trading or scalping too!

2. I'm overhauling the ebook once again to include more method diversity. This will take me a good little while due to the amount of content I have planned for it.

3. I'm working on creating my own algos since i already have more than enough experience with trading to create them. This is to allow me to have 100% confidence in everything I put out, and I can easily fix any bugs, though with the level of rigorous testing I'm doing for them, including monte carlo simulations+more, there most certainly won't be any.

PM me if you have any questions, or if you would like to purchase early in order to get the new updates for way cheaper than when i finally push the new updates.

There are methods from safe to high risk and require investment, all of them which OP have tried before selling them, OP also invited me to his discord server and he will keep updating the methods.

He's friendly and responds fast to my questions.

It's a fair price for \$100 because you'll get a lot of content + discord access.

Added more methods today, including some new methods which do between 0.8% and 1.5% daily! All sustainably too! It's so good that I had to add it to the thread title! Hope everyone has a great night/tomorrow.

PS: Got my payout from the method above :)

CasualInvesting - May 11, 2022, 10:05 am

making about 15 matic daily from one of the new passive income methods. This one is medium risk.

(Apr 29, 2022 12:45 PM)CasualInvesting Wrote: [CITE](#) Thanks for the review. Due to that same incident I've made a few major changes to how I'm moving forward.

1. First thing first, i'll be releasing a manual trading method for the eBook next week. Requires a small investment to get TV Premium and one indicator (you've already seen it in the upcoming section of the group). This method can be fully manual, or semi-automatic, or both. Can be used for swing trading or scalping too!
2. I'm overhauling the ebook once again to include more method diversity. This will take me a good little while due to the amount of content I have planned for it.
3. I'm working on creating my own algos since i already have more than enough experience with trading to create them. This is to allow me to have 100% confidence in everything I put out, and I can easily fix any bugs, though with the level of rigorous testing I'm doing for them, including monte carlo simulations+more, there most certainly won't be any.

PM me if you have any questions, or if you would like to purchase early in order to get the new updates for way cheaper than when i finally push the new updates.

Yeah bro, as I said I'll be on board for your algos, I will also write you regarding your 2. point.

CasualInvesting - May 14, 2022, 4:51 pm

Currently it's in manual trading form. Need to decompile the Indicators and make them into an algo. For now, it's 2 manual trading methods. I'll be releasing them as a separate ebook tomorrow.

These methods can definitely do over 50% per week with proper risk management and some market experience. Will also provide a copy-trade service as part of Algo Empire in a few weeks. There's a lot more technical details and logistics that need to be worked on to ensure safety, but there is a lot in store for members in some weeks. Can't rush it too much..

Algo Empire will be making a comeback this week. Had to take down most bots and work on my own strategies instead. Initial tests have been going well, and access to the bot will be granted to all auto safe profits members. Will be copy-trading with a profit split weekly, bi weekly or monthly depending on how profitable we are every given week. Myfxbook etc will be coming this week.

CasualInvesting - May 21, 2022, 2:22 pm

been a lil while since i've posted an update. Just been working mainly on trading methods and making my own strategies. I also have a new major project coming up soon. Fully focused on making my own stuff vs trying to find new methods.

currently offering 30% off, just pm me!

Are you sharing projects like titano, libero, lockpay, lucy 777? These types will allow mostly 1% cashout daily. Even though the coin makes 5x -10x we cant make a profit earlier. Please confirm

i mention some node projects but only strong ones that have a good chance of doing well after the downturn is over. I don't recommend any of the above ones you mentioned.

These projects though are only a side piece and are not part of the main methods which have nothing to do with those projects.

jack0929 - June 9, 2022, 5:01 pm

are the main methods related to Defi projects miners? most of them are scam as their ROI reduce or they just exit?

CasualInvesting - June 12, 2022, 3:04 am

no, i recommended a couple for a short time and advised everyone when to exit in the past.

I don't recommend any miners now.

blast79 - July 21, 2022, 1:50 pm

Hey tried adding you on discord but you werent accepting friend requests... had a couple of questions

1. How much money is suggested for these methods
2. How quickly can you expect returns?
3. How complicated are the methods?

CasualInvesting - July 21, 2022, 2:53 pm

hey my bad, changed the settings!

1. \$100+ is fine
2. you'll start getting payouts daily but its best to compound
3. not complicated at all! very simple

CasualInvesting - July 29, 2022, 1:27 pm

bump, making good progress with the bot creation. Just a few more weeks of forward testing and i'll drop more info. Will be bringing price back up to either \$199 or \$299 once its closer to completion :)

CasualInvesting - August 1, 2022, 2:00 am

Working hard for the members of the discord, over 200 strong! Here's a sneak peak of just one of the new indi/strategy i'll be dropping. Once its fully tested and released the price will be going back up. I'm also working on bots for the group. Those will hopefully get released soon too and will also affect the price.

CasualInvesting - August 3, 2022, 8:46 am

bump! Bot is in development too. It will be pretty wild once its done and forward testing is complete :D

bump for this forum tho people would rather some get rich quick scams around here it seems lol

CasualInvesting - August 4, 2022, 11:40 pm

Update: V1 of the bot is now made. Did some testing last night and while there are still some small issues, it's doing what i want it to do overall. I will continue to test it into next week and once i get a hang of managing the bot, i'll start bringing testers on for copy-trading. For obvious reasons if i just simply drop the bot file, it's bound to get leaked, cracked shared and eventually picked up on by institutions to maybe counter
