Thread: [Looking for full stack web developer](#)

Sliced - March 4, 2022, 7:44 am

Frontend would be HTML - CSS - JavaScript.
Backend would be PHP (Laravel).
DB would be MySQL.

Thanks.

Please contact at me onforums private message.
[contract=tid]Start Contract[/contract]

Let me know the details, thank you.

r1t0 - March 4, 2022, 8:06 am

yo, hit me up, i'm interested!

MiguelSanchez - March 4, 2022, 8:08 am

Hey, I think this is me but I don't know if by curl you just mean the bash command, or some framework I'm unfamiliar with. If it's the former I can do this.
I'll pm you

I can build that site for you. Any type of site.

experience in coding.

Example of my work <https://www.naisend.com>

Can handle anytype of HTML/HTML5, CSS, JavaScript, jQuery, MySQL, MariaDB, PHP and Java project for you.

Contact me on Telegram @elipheleh

Or PM me on HackForums

r3byte - *March 17, 2022, 11:27 am*

I can help with this.

I have built many Laravel platforms. HMU
