Thread: [Facebook is not letting me add my website link on post ?](#)

Transporter007 - March 4, 2022, 7:53 am

Hey guys,

I am adding my website link and even used bitly and shorturl but while posting the post it keep showing posting and posting. And not letting me post.

Any idea how to fix it out ?

Regards.

it's not a libk problem, if it was it should tell you that you're not allowed to share this post for some reasons but if it keeps showing posting might be an internet problem

Maybe get another domain and forward it to that one.

You can get a free .design domain on Porkbun.com right now.

Its not an internet problem. The problem is from facebook as its creating username on different page and posting also allowed.

Any facebook live chat link ?
