KillSwitch? - March 4, 2022, 4:42 pm

Hey!

The Week of #MoneyGrind

So now I have a whole week straight just free, and I will dive in some coding. I do coding ow for 10 years, and I am also a "Backup Maniac ?) So I have so manu very good projects ready to launch (~80 ready). Others just started, more ideas, access to a lot of interesting stuff, and so on.

The problem is that I am more of a Back-End Developer, since I have 2 arms, I just can not code everything. A this point I need a good, quick, and reliable partner to bomb projects 1 by 1, like kids hehe.

DM me and we can talk.

PS. We would probably open a private Git, and use a good Version Control System.
