Thread: [selling verified facebook pages](#)

mafia1337 - March 6, 2022, 6:47 am

Hello there

as title said i'm selling verified facebook pages

sometimes i have twitter but there's nothing on stock right now " make sure you ask for it and wait untill i got you one " ?

there's nothing to talk about fan numbers they are empty

some of pages had like 100 some of em have 1k but we can add some fake fans if you need purpose of selling those pages with no fans that alot of start ups need verified page for client satisfaction and make the long way short for building trust bridge between you and the clients

" i verify those pages my self or one of my team "

so they are 100% legit 100% whitehat we make news about the person on our national newspapers " massively "

pages comes with different names but i offer you name change with "\$300"

there's no grantee about the badge will be there or not if you decide to change the name from your end

but we still can solve it out some how

prices aren't same so whenever you need a verified page just contact me and check for availability and price for it

price changes and it depend on fan numbers of the page but anyway it will start from \$1200

there's alot of ways to proof my ownership of pages " discord , team viewer , add you as Analyst on the page to check it yourself Uber only "

i accept BTC and WU payments

here's my discord to check availability " Modie#0252 "
