Thread: [Thread Got Junked Without Warning](#)

Jedi Tools™ - March 6, 2022, 10:47 pm

Hello HF Staffs,

I created one sale thread and it got deleted without any warning. The thread was related to 'Botnet Setup Service'.

I see many other members doing botnet setup service, thus not sure if it was not allowed or was anything wrong.

Could anyone check and help me learn, so I might not repeat anything similar?

NotKover - March 6, 2022, 11:15 pm

Did you make sure the post followed the rules on what is allowed on hf like tool functionality, and did you post it under the correct market area?

EDIT: if you send me a message and i can take a look at what you want posted and try to help make sure it follows the rules and is in the correct area etc.

It was in the correct section as the similar thread categories were there. Just not sure why it got junked.

Check my signature, it redirects to my service thread link. (No longer available as it got junked)

You know what is "Anubis" ? It is a banking malware family resigned for android and targeting hunderds of banking applications around the world.

Not allowed on hackforums

Omniscient - March 7, 2022, 9:43 am

Warning added to your account so that you're aware of the policy violation that we don't allow banking based malware.
