Hello there, are there any vouch copies? I'm really interested in this.

Also, does the code commented or has a documentation, if not, are you providing guidance if we have a problem?

I do not offer any vouch copies sorry, but first 2 buyers are getting from discounted prices. Prices are very fair considering otherwise you have to pay a lot more for using services like dxsale, pinksale etc.

I will provide a detailed setup guide and my full support afterwards. You all covered. If you want to see a live demo let me know.

He has delivered what he mentioned above and promised, I've made deployment with the content and it seems like working.

I will be updating the post once I've completely used every part of the scripts.

PS: I went first with the payment.
