Thread: [Quasar rat connecting to "proinity"](#)

SIM-5165532 - March 12, 2022, 1:48 am

What is proinity.com? The built client of Quasar connects to it and I've no idea what it is, every google search about it is fruitless. I was thinking that it may be some sort of backdoor but I honestly don't know. It certainly isn't something the creator would want anyone to know as I couldn't find it in the source.

jmark7 - March 12, 2022, 2:05 am

are you sure you using the binaries from official github page?

SIM-5165532 - March 12, 2022, 2:57 am

I compiled the source code from the official github page. I didn't download the binaries

bunnyduff - March 12, 2022, 4:02 am

first time hearing about this

if the source is clean, I dont see a reason of it to connect to domain.
Lets wait for other users view on this.

Lets wait for other users view on this. Just because I didn't find it by searching text doesn't mean it doesn't exist, there are lots of sneaky ways to hide something like this in a project. But yeah you're right, even I don't know what it is.

No I didn't scan it, my anti-virus did and prompted me with the IP the client tried to connect to. The website and company looked hella sketchy not to mention it was located in Switzerland so that's why I posted about it. My bad if it's nothing, I'm just paranoid over everything

mention it was located in Switzerland so that's why I posted about it. My bad if it's nothing, I'm just paranoid over everything
so at the end there is nothing to worry about the source.

(Mar 13, 2022 12:34 AM)jmark7 Wrote: [\[CITE\]](#) so at the end there is nothing to worry about the source. Don't know, as I said there can be many ways someone could hide a backdoor in it. If everyone says it's nothing then I won't take this further.

tridentbreeze - March 13, 2022, 5:28 am

never noticed this before take a look today

runs3c - March 15, 2022, 12:35 pm

are you certain it comes from Quasar? maybe you have another soft doin it

SIM-5165532 - March 16, 2022, 11:44 am

I know because it blocked the connection from the rat client. "Connection X blocked from program Y"
